Holocaust Sp Mode:

The Palgrave Handbook of Holocaust Literature and Culture Victoria Aarons, Phyllis Lassner, 2020-01-24 The Palgrave Handbook of Holocaust Literature and Culture reflects current approaches to Holocaust literature that open up future thinking on Holocaust representation. The chapters consider diverse generational perspectives: survivor writing, second and third generation, and genres: memoirs, poetry, novels, graphic narratives, films, video testimonies, and other forms of literary and cultural expression. In turn, these perspectives create interactions among generations, genres, temporalities, and cultural contexts. The volume also participates in the ongoing project of responding to and talking through moments of rupture and incompleteness that represent an opportunity to contribute to the making of meaning through the continuation of narratives of the past. As such, the chapters in this volume pose options for reading Holocaust texts, offering openings for further discussion and exploration. The inquiring body of interpretive scholarship responding to the Shoah becomes itself a story, a narrative that materially extends our inquiry into that history.

Digital Holocaust Memory, Education and Research Victoria Grace Walden, 2021-12-03 This book explores the diverse range of practical and theoretical challenges and possibilities that digital technologies and platforms pose for Holocaust memory, education, and research. From social media to virtual reality, 360-degree imaging to machine learning, there can be no doubt that digital media penetrate practice in these fields. As the Holocaust moves beyond living memory towards solely mediated memory, it is imperative that we pay critical attention to the way digital technologies are shaping public memory and education and research. Bringing together the voices of heritage and educational professionals and academics from the arts and humanities and the social sciences, this interdisciplinary collection explores the practicalities of creating digital Holocaust projects, the educational value of such initiatives, and considers the extent to which digital technologies change the way we remember, learn about, and research the Holocaust, thinking through issues such as ethics, embodiment, agency, community, and immersion. At its core, this volume interrogates the extent to which digital interventions in these fields mark an epochal shift in Holocaust memory, education, and research, or whether they continue to be shaped by long-standing debates and guidelines developed in the broadcast era.

Deadly Developments Stephen and Downs Reyna, 2005-08-04 Ten anthropologists trace the machinations of war and the effects of violence in capitalist states from their formation to the present. This collection, the newest volume in the War and Society series, questions the foundations of classical social theory while investigating local and international conflict through the critical and cross-cultural lens of social theory, history, and anthropology. The essays combine to challenge the notion developed by social theorists such as Comte, Spencer, Durkheim, and Engels that war will diminish with the formation and the perpetuation of a capitalist economy and industry. The development of capitalist states and the nefarious and violent processes which must occur to reproduce capitalism are rarely realized and then infrequently analyzed. Many western and ethnocentric scholarly representations of war succeed in hiding the deadly developments that

occur as a result of capitalist state formation and relations Modes and Meaning: Displays of Evidence in Education Geert Thyssen, Karin Priem, 2018-02-02 In the past few decades there has been a growing interest and debate amongst historians of education surrounding issues of visibility materiality spatiality transfer and circulation This collection of essays with its focus on the interaction between ideas images objects and or spaces that contain an educational dimension is a contribution to this ongoing debate The contributors address how meaning is created conveyed and transformed through multiple modes of communication representation and interaction through movement across spaces through media and technologies and through collective memory and identity making The collection demonstrates that meaning is mobilized through multimodality translocation technology and heritage and that it assumes different qualities which need to be reflected upon in the history of education in particular and in education research in general This book was originally published as a special issue of *Paedagogica Historica* *American Heritage* ,1994 **Der Holocaust und die westdeutschen Historiker** Nicolas Berg, 2013-09-11 Nicolas Berg untersucht die Schwierigkeiten der westdeutschen Geschichtswissenschaft im Umgang mit dem Holocaust Geschichte und Gedächtnis so Charles P.
