Brown,2022-03-22 A groundbreaking expos of racism in the American taxation system from a law professor and expert on tax policy NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR AND FORTUNE Important reading for those who want to understand how inequality is built into the bedrock of American society and what a more equitable future might look like Ibram X Kendi 1 New York Times bestselling author of How to Be an Antiracist Dorothy A Brown became a tax lawyer to get away from race As a young black girl growing up in the South Bronx she d seen how racism limited the lives of her family and neighbors Her law school classes offered a refreshing contrast Tax law was about numbers and the only color that mattered was green But when Brown sat down to prepare tax returns for her parents she found something strange James and Dottie Brown a plumber and a nurse seemed to be paying an unusually high percentage of their income in taxes When Brown became a law professor she set out to understand why In The Whiteness of Wealth Brown draws on decades of cross disciplinary research to show that tax law isn t as color blind as she d once believed She takes us into her adopted city of Atlanta introducing us to families across the economic spectrum whose stories demonstrate how American tax law rewards the preferences and practices of white people while pushing black people further

behind From attending college to getting married to buying a home black Americans find themselves at a financial disadvantage compared to their white peers The results are an ever increasing wealth gap and more black families shut out of the American dream Solving the problem will require a wholesale rethinking of America s tax code But it will also require both black and white Americans to make different choices This urgent actionable book points the way forward

The Economics of Affordable Housing Alexander Styhre,2022-11-23 The economic system of competitive capitalism has proven to be both resilient and flexible over time and has contributed to the economic welfare of citizens in liberal and coordinated market economies in diverse regions and countries At the same time over the entire post World War II period there has been a notable endemic shortage of affordable housing in many advanced economies This book points at both the causes and the consequences of this circumstance and provides an integrated economic and legal view of how housing production is dependent on housing finance which in turn means that legal conditions and the sovereign state play an active role Further the book contributes to the literature from two otherwise partially separated disciplines housing and urban development studies on the one hand and the institutional centrality of the finance industry in the contemporary economic system on the other The author asserts that although somewhat assimilated due to the ambitions of policy makers to optimize social and economic welfare for their constituencies the combining of these two realms of expertise generates many favorable outcomes but also some costs derived from finance industry instabilities The book connects theoretical perspectives and provides an empirical explanation for how affordable housing is generated in an actual real world economy context The book will be relevant to the work of a number of academic disciplines including economics government studies housing policy and urban planning social geography and law and society
