

that money was previously destined for – rent, food, child support, etc. This is why crime is so expensive to endure – it usually entails a loss of a significant portion of a victim's life. Murdering a few weeks of a person's life is not an admirable or acceptable act. Few people would be willing to toil for absolutely nothing if they were given the choice between that and taking the time off to educate themselves, have a vacation, or make a difference to others.

How people affect each other is a fair indicator of their worth as human beings. A theft or destruction of property that effectively cancels a week or so for a victim shows a criminal's emptiness and inconsideration.

Remember to look at what is effective. Whether you are on one side or another of an issue or a locked door, sticking merely to one side will not improve your understanding or your ability to function. Holding to a position regardless of the interests involved or other perspectives almost always has consequences outside of the narrow vision held and defended. Those consequences are eloquent testimony against a closed-minded person's right to exercise his will, and they demonstrate his irresponsibility. Regarding the multitudes of evils that willful inconsideration has produced – pollution, warfare, neglect, inefficiency and waste, destruction and failure – it makes very little sense to act with willful disregard to other positions. Acting with care toward what can happen and who will be affected, meeting possibilities and consequences responsibly and honorably, is the most intelligent way to use knowledge. Acting merely in self interest without regard to consequences is stupid, destructive, and wrong, though often profitable in a low and narrow fashion. It is intensely unlikely that selfishness justified by uninspired necessity will save the world or even let it go around much longer. Though human beings have always behaved this way, thus separating themselves from their potential, and probably always will, appeals should be made to the contrary. The attention and care you use to perform the procedures outlined in this book should make clear to you a parallel necessity to preserve the social framework we live in. It doesn't do much good to mess it up.

GUIDELINES TO SUCCESSFUL LOCK BYPASS

READ THIS ENTIRE CHAPTER. It contains information without which people fail, waste time, or break things. This information was distilled from instructing and correcting hundreds of people more eager to begin than to think. Thoughtfulness will allow you to avoid pitfalls you will invariably be mired in if armed only with techniques. This is the most important chapter in the book.

Make a habit of physically checking to see if you have your keys before going through a door or leaving a car. If you think you are holding them, look down and visually confirm it. If you think they're in your pocket, make sure by feeling them with your hand. This won't take any time if you do it on the way to the door, and it does prevent you from locking yourself out. Most people are preoccupied when they leave their keys behind. Merely thinking that you have your keys is not as reliable as actually checking to make sure.

If you do find yourself locked out, systematically go over all of the obvious factors that can get you in before attempting a bypass. Unless you make a conscious effort to go step by step and find out for sure whether an emergency even exists, you can make a fool of yourself trying to bypass a lock when it is unnecessary to do so. Go around and try every door – one may be unlocked. Retrieve a spare key if you have one, look for open windows, check all the obvious places (pocket, hand, string around neck, backpack, friend standing around, etc.) you may have left your keys. Common sense is difficult to employ when you're under stress, but it is important to keep hold of. Don't focus on subtleties without heeding the obvious.

Locks were made to be opened with a proper key or combination. Because they were not designed to be circumvented, you risk impairing their function when you fiddle with them. Aside from practice, which should be done in a controlled situation to develop the skills required for efficient bypass, do not attempt a bypass unless you have to. Calling a roommate or a spouse and waiting is the most reasonable solution to a lockout. If your car is locked and you carry towing insurance, it will cover the cost of opening your car without a deductible, though you may have to pay up front and then file a claim. Car clubs cover lockouts for their members. Many automakers have roadside assistance programs just a toll-free call away. These are great alternatives in an emergency. Do not use a bypass method to avoid embarrassment. If an apartment manager, co-
