between sport education and wider society that puts into context the reader's applied studies in PE and coaching. Drawing on cutting edge research, this book examines core topics in the study of sport and society including the origins of sport, sport education, sport as business, commodification, globalisation, sport and health, sport and the media, gender, migration and Indigenous people in sport. Throughout this book, in-depth commentary pieces look closely at particular pieces of research that illustrate the sociological themes being examined, from the impact of sport media on school children to the effects of hegemonic masculinity in rugby. This book is invaluable reading for any course on sport and society, physical education, sports coaching or sport development.

Sport and Contested Identities David Hassan, Ciaran Acton, 2017-09-07 Identity is one of the most theorised and contested of all sociological concepts and sport is fertile ground for an examination of its complexities. This book offers a wide-ranging and up-to-date exploration of the sport identity nexus, drawing examples from a variety of sporting contexts and geographical locations and incorporating a diversity of perspectives including players, spectators, officials, the media and policy makers. Covering key themes in the social scientific study of sport such as gender, ethnicity and national identity, it considers the impact of social, cultural and technological change on the formation of sporting identities. Including original real-life case studies, each chapter makes a unique contribution to our understanding of the complex relationship between sport and identity. As this relationship is embedded within the broader structures of power that frame social inequality, this book also poses important questions about the role of sport-related initiatives in our society today as well as in years to come.

Sport and Contested Identities: Contemporary Issues and Debates is fascinating reading for all students and scholars of the sociology of sport.

He was shocked to discover that his young son not only had no intention of following in his father's footsteps as a Liverpool fan but preferred a Newcastle shirt because it was more fashionable. *Faith of our Fathers* is more than a personal story; it is a universal tale written with a strong sense of pathos and a rare capacity to bring to life the concerns of fans who feel the game they grew up with is being eroded by commercial exploitation.

The authors challenge simplistic explanations of Indigenous success in Australian football and rugby league centered on the notion of the natural athlete. The book traces the development of Indigenous sporting expertise as a lifelong process of learning situated in local culture and shaped by the challenges of transitioning into professional sport. Individually, the life stories told by the participants provide fascinating insights into experience, culture and learning. Collectively, they provide deep understanding of the powerful influence that Aboriginal culture exerted on the participants' journeys to the top of their sports while locating individual experience and agency within larger economic, cultural and social considerations. *Stories of*
