*Unbreakable* Nate Boggs, 2022-02-18 The emotional gravitude of societal events of 2020 combined with the anti police rhetoric that swept across mainstream media and social media platforms caused a ripple effect that directly impacted police officers who already have an extraordinarily stressful job Police officers all over the Nation felt unfairly vilified for the actions of a few and morale went to an all time low The author Nate Boggs understands the difficulty of the job and has dedicated his life to helping his brothers and sisters who have the courage to wear a badge The community generally doesn't realize the daily challenges that police officers face or the types of critical incidents that law enforcement officers deal with on a routine basis To illustrate this Nate has provided real stories from his career raw personal experiences and thoughtful lessons derived from each one to provide a better understanding of the intricacies of the modern law enforcement officer Mental

resilience is just as important as any other tool utilized in law enforcement This book is designed to not only help the reader to understand the difficulties and realities of the profession of a law enforcement officer but also provide a way for police officers to overcome these challenges to ultimately retire healthy with an intact family unit      *Observing Evolution* Bruce S. Grant, 2021-08-10 A firsthand account of how a modest moth demonstrated Darwin's theory of natural selection The extraordinary tale of the humble peppered moth is at the very foundation of our acceptance of Darwinian evolution When scientists in the early twentieth century discovered that a British population of the small speckled *Biston betularia* had become black over the course of mere decades in response to the Industrial Revolution's encroaching soot the revelation cemented Darwin's theory of natural selection This finding was the staple example of evolution in action until the turn of the millennium when proponents of Creationism fomented doubts about the legitimacy of early experiments In the midst of this upheaval evolutionary biologist Bruce S Grant and his contemporaries were determinedly building a dataset that would ultimately vindicate the theory of industrial melanism in the peppered moth and by extension the theory of natural selection itself *Observing Evolution* tells the remarkable story of this work Shining a light on the efforts of scientists who tested Darwin's trailblazing theory Grant chronicles the historical foundations of peppered moth research then explains how he and his collaborators were able to push this famous study forward He describes how his experiments were designed and conducted while painting a vivid picture of the personalities events and adventures around the world that shaped his successes and struggles His story culminates with his discovery of the mirrored rise and fall of melanism in peppered moth populations separated by the vastness of the Atlantic Ocean which settled the intense controversy around evolution by documenting nature's recurring experiment *Observing Evolution* is a crash course in natural selection and the history of evolutionary biology for anyone interested in Darwin's legacy It's also a fascinating read for lepidopterists and scientists about the bridge between classic experiments and today's sophisticated DNA sequencing which reveals in ever greater detail how the lives of these tiny organisms have such enormous implications Douglas J Futuyma *Quarterly Review of Biology*

*Minding the Helm* Kevin P. Gilheany, 2019-05-15 As a boy growing up in New York City Kevin P Gilheany had two dreams to join the Coast Guard and to play the bagpipes But by the time he finished high school he was overweight had a drinking problem and couldn't swim Undeterred by the doubts of the folks at home he decided to enlist in the Coast Guard anyway With great determination and some divine intervention he passed the swim test and graduated from boot camp thus beginning an eventful and diverse twenty year career in the 1980s and 1990s Coast Guard He set a goal for himself to get command of his own patrol boat and along the way he was involved in capturing drug smugglers rescuing hundreds of Haitian migrants at sea recovering Space Shuttle Challenger debris surviving a hooligan navy experience on a Coast Guard workboat coordinating search and rescue during the famed Perfect Storm and leading armed boardings of ships following the terrorist attacks of 9/11 When he was asked by one of his men who was dying from brain cancer to play bagpipes at his

retirement ceremony Kevin started down a new path to have bagpipers officially recognized as part of the Coast Guard This ultimately led a boy who couldn't swim to fulfill both of his childhood dreams and leave a lasting legacy by founding the U S Coast Guard Pipe Band
