

How to prepare for your TOEFL Exam

Updated: Nov 15, 2021

One of the most important things to remember about the TOEFL iBT Test is that it isn't *just* an English test. Students must be aware that the TOEFL is a test of *academic* English. Here's what ETS (the creators of the TOEFL) say about it in the Official Guide to TOEFL:

"The language used in the test reflects real-life English language usage in university lectures, classes, and laboratories. It is the same language professors use when they discuss coursework or concepts with students. It is the language students use in study groups and everyday university situations, such as buying books at the bookstore. The reading passages are from real textbooks and course materials."

The TOEFL test probably includes more academic language than any other major test of English proficiency. This means that preparing for it can be challenging, but also very rewarding. Students preparing for the TOEFL test shouldn't just practice their English skills in general, but should focus on specific academic skills. For this reason, I strongly recommend that students start preparing for the TOEFL test as early as possible.

In this guide, I will quickly describe each section of the TOEFL test and suggest a few strategies for developing related academic English skills. The advice here will be most beneficial for people who have six months or more to prepare for the test, but I think there will be useful information for all readers.

TOEFL Reading

The reading section is the first part of the TOEFL test. In this section, you will read three or four articles (about 700 words each) and answer questions that test your comprehension of them. The articles are similar to what you might find in a first-year university textbook. According to [my study](#) of the test, the most frequent topics in the reading section are history, zoology, physical geography, and biology. Since the articles are all introductory level, special knowledge of the subjects isn't required. However, it can be very beneficial to practice academic reading in general before taking the test.

My favorite source of short academic articles is [Science News Magazine](#). This magazine frequently publishes articles about animals and early human history that are about the same length and difficulty level as the articles on the TOEFL. Try reading a few of those every day. As you read, you should write short summaries (one or two sentences) of each paragraph. This will

Writing in Foreign Language Contexts Rosa Manchón, 2009-07-09 This book represents the most comprehensive account to date of foreign language FL writing Its basic aim is to reflect critically on where the field is now and where it needs need to go next in the exploration of FL writing at the levels of theory research and pedagogy hence the two parts of the book Looking back and Looking ahead The chapters in Part I offer accounts of both the inquiry process followed and the main insights gained in various long term research programs The chapters in Part 2 contribute a retrospective analysis of the available empirical research and of professional experiences in an attempt to move forward The book invites the reader to step back and rethink seemingly well established knowledge about L2 writing in light of what is known about writing in FL contexts

Argumentative Writing in a Second

Language Alan R. Hirvela, Diane Belcher, 2021-12-13 *Argumentative Writing in a Second Language* is a collection on teaching argumentative writing offering multiple vantage points drawn from the contributors' own teaching and research experiences. The value of learning how to compose argumentative texts cannot be overstated and yet very little attention has been allocated to the equally important topic of how argumentation is or can be taught in the L2 context. Thus this volume shifts attention to teachers and argumentative writing instruction especially within increasingly common multimodal and digital literacy settings. While doing so it provides a comprehensive wide ranging view of the L2 argumentative writing landscape within an instructional lens. Part I of the volume is topic oriented and focuses on explorations of important issues and perspectives while Part II features several chapters reporting classroom based studies of a variety of instructional approaches that expand our understanding of how argumentative writing can be taught. The book will be of value to pre service and in service teachers in varying instructional contexts as well as teacher educators and L2 writing scholars researchers.

Automated Grammatical Error Detection for Language Learners, Second Edition Claudia Leacock, Michael Gamon, Joel Alejandro Mejia, Martin Chodorow, 2022-06-01 It has been estimated that over a billion people are using or learning English as a second or foreign language and the numbers are growing not only for English but for other languages as well. These language learners provide a burgeoning market for tools that help identify and correct learners' writing errors. Unfortunately the errors targeted by typical commercial proofreading tools do not include those aspects of a second language that are hardest to learn. This volume describes the types of constructions English language learners find most difficult: constructions containing prepositions, articles and collocations. It provides an overview of the automated approaches that have been developed to identify and correct these and other classes of learner errors in a number of languages. Error annotation and system evaluation are particularly important topics in grammatical error detection because there are no commonly accepted standards. Chapters in the book describe the options available to researchers, recommend best practices for reporting results and present annotation and evaluation schemes. The final chapters explore recent innovative work that opens new directions for research. It is the authors' hope that this volume will continue to contribute to the growing interest in grammatical error detection by encouraging researchers to take a closer look at the field and its many challenging problems.
