How To Raise An Ox:

How to Raise an Ox Francis Harold Cook,1978 *Zen Buddhism: Japan* Heinrich Dumoulin,2005-08-16 In this second volume of his classic history one of the world s foremost Zen scholars turns his attention to the development of Zen in Japan

Visions of Awakening Space and Time Taigen Dan Leighton,2008-12-31 As a religion concerned with universal liberation Zen grew out of a Buddhist worldview very different from the currently prevalent scientific materialism Indeed says Taigen Dan Leighton Zen cannot be fully understood outside of a worldview that sees reality itself as a vital dynamic agent of awareness and healing In this book Leighton explicates that worldview through the writings of the Zen master Eihei Dogen 1200-1253 considered the founder of the Japanese S t Zen tradition which currently enjoys increasing popularity in the West The Lotus Sutra arguably the most important Buddhist scripture in East Asia contains a famous story about bodhisattvas enlightening beings who emerge from under the earth to preserve and expound the Lotus teaching in the distant future The story reveals that the Buddha only appears to pass away but actually has been practicing and will continue to do so over an inconceivably long life span Leighton traces commentaries on the Lotus Sutra from a range of key East Asian Buddhist thinkers including Daosheng Zhiyi Zhanran Saigyo Mye Nichiren Hakuin and Rykan But his main focus is Eihei Dogen the 13th century Japanese S t Zen founder who imported Zen from China and whose profuse provocative and poetic writings are important to the modern expansion of Buddhism to the West Dogen s use of this sutra expresses the critical role of Mahayana vision and imagination as the context of Zen teaching and his interpretations of this story furthermore reveal his dynamic worldview of the earth space and time themselves as vital agents of spiritual awakening Leighton argues that Dogen uses the images and metaphors in this story to express his own religious worldview in which earth space and time are lively agents in the bodhisattva project Broader awareness of Dogen s worldview and its implications says Leighton can illuminate the possibilities for contemporary approaches to primary Mahayana concepts and practices **How to Raise an**

Dr. Ox's Experiment, and Other Stories Jules Verne,1874 *The Contendings of the Apostles* Sir Ernest Alfred Wallis Budge,1901 *The Book of Master Mo* Mo Zi,2013-11-07 A key work of ancient Chinese philosophy is brought back to life in Ian Johnston s compelling and definitive translation new to Penguin Classics Very little is known about Master Mo or the school he founded However the book containing his philosophical ideas has survived centuries of neglect and is today recognised as a fundamental work of ancient Chinese philosophy The book contains sections explaining the ten key doctrines of Mohism lively dialogues between Master Mo and his followers discussion of ancient warfare and an extraordinary series of chapters that include the first examples of logic dialectics and epistemology in Chinese philosophy The ideas discussed in The Book of Master Mo ethics anti imperialism and a political hierarchy based on merit remain as relevant as ever and the work is vital to understanding ancient Chinese philosophy Translator Ian Johnston has an MA in Latin a PhD in Greek and a PhD in Chinese and was Associate Professor of Neurosurgery at Sydney University until his retirement He has published translations of Galen s medical writings early Chinese poetry Singing of Scented Grass and Waiting for the Owl and early Chinese philosophical works the Mozi and with Wang Ping the Daxue and Zhongyong In 2011 he was awarded the NSW Premier s Prize and the PEN medallion for translation Unlike previous translations this version includes the complete text It also includes an introduction and explanatory end notes A landmark endeavour Asia Times A magnificent and valuable achievement Journal of Chinese Studies Eminently readable and at the same time remarkably accurate Johnston s work will be the standard for a long time China Review International Compelling and engaging reading while at the same time preserving the diction and rhetorical style of the original Chinese New Zealand Journal of Asian Studies

The Gongsun Longzi and Other Neglected Texts Rafael Suter,Lisa Indraccolo,Wolfgang Behr,2020-04-06 The Gongsun Longzi is often considered the only extant work of the Classical Chinese School of Names an early intellectual tradition trad dated to the 4th cent B C mainly concerned with logic and the philosophy of language The Gongsun Longzi is a heterogeneous collection of five chapters that include short treatises

and largely fictive dialogues between an anonymous persuader and his opponent which typically revolve around a paradoxical claim Its value as a testimony to Early Chinese philosophy however is somewhat controversial due to the intricate textual history of the text and our limited knowledge about its intellectual backgrounds This volume gathers contributions by leading specialists in the fields of Classical Chinese philosophy philology logic and linguistics Besides an overview of the scholarly literature on the topic and a detailed account of the reception of the text throughout time it presents fresh insights into philological and philosophical problems raised by the Gongsun Longzi and other closely related texts equally attributed to the School of Names 公孙龙子, 2010 An English translation of the complete work and the first bilingual version in any European language It is one of the small number of key texts surviving from the first flowering of Chinese philosophy during the Warring States period

Advances in Fuzzy Sets, Possibility Theory, and Applications P.P. Wang, 2012-12-06 Since its inception by Professor Lotfi Zadeh about 18 years ago the theory of fuzzy sets has evolved in many directions and is finding applications in a wide variety of fields in which the phenomena under study are too complex or too ill defined to be analyzed by conventional techniques Thus by providing a basis for a systematic approach to approximate reasoning and inexact inference the theory of fuzzy sets may well have a substantial impact on scientific methodology in the years ahead particularly in the realms of psychology economics engineering law medicine decision analysis information retrieval and artificial intelligence This volume consists of 24 selected papers invited by the editor Professor Paul P Wang These papers cover the theory and applications of fuzzy sets almost equal in number We are very fortunate to have Professor A Kaufmann to contribute an overview paper of the advances in fuzzy sets One special feature of this volume is the strong participation of Chinese researchers in this area The fact is that Chinese mathematicians scientists and engineers have made important contributions to the theory and applications of fuzzy sets through the past decade However not until the visit of Professor A Kaufmann to China in 1974 and again in 1980 did the Western World become fully aware of the important work of Chinese researchers Now Professor Paul Wang has initiated the effort to document these important contributions in this volume to expose them to the western researchers
