How To Respond To The Science Religions:

How to Respond to the Science Religions Frederick R. Harm, 1981 Science, Religion and Deep Time Lowell Gustafson, Barry Rodrigue, David Blanks, 2022-07-05 This book examines the meaning of religion within the scientific evidence based history of our known past since the big bang While our current major religions are only centuries or millennia old our volume discusses the origins and development of human religious practice and belief over our species existence of 300 000 years The volume also connects the scientific approach to natural and social history with ancient truths of our religious ancestors using new lines of inquiry new technologies new modes of expression and new concepts It brings together insights of natural scientists social scientists philosophers writers and theologians to discuss narratives of the universe The essays discuss that to apprehend religion scientifically or to interpret and explain science theologically the subject must be examined through a variety of disciplinary lenses simultaneously and raise several theoretical philosophical and moral problems With a singular investigation into the meaning of religion in the context of the 13 8 billion year history of our universe this book will be indispensable for scholars and students of religious studies big history sociology and social anthropology philosophy and science and technology studies Religious Responses to Modernity Yohanan Friedmann, Christoph Marksches, 2021-02-22 The dawn of the modern age posed challenges to all of the world s religions and since then religions have countered with challenges to modernity In Religious Responses to Modernity seven leading scholars from Germany and Israel explore specific instances of the face off between religious thought and modernity in Christianity Judaism and Islam As co editor Christoph Marksches remarks in his Foreword it may seem almost trivial to say that different religions and the various currents within them have reacted in very different ways to the multiple modernities described by S N Eisenstadt However things become more interesting when the comparative perspective leads us to discover surprising similarities Disparate encounters are connected by their transnational or national perspectives with the one side criticizing in the interest of rationality as a model of authorization and the other presenting revelation as a critique of a depraved form of rationality The thoughtful essays presented herein by Simon Gerber Johannes Zachhuber Jonathan Garb Rivka Feldhay Paul Mendes Flohr Israel Gershoni and Christoph Schmidt provide a counterweight to the popularity of some all too simplified models of modernization *How to Respond To-- Satanism* Bruce G. Frederickson, 1988 **Quakers, Jews, and Science** G. N. Cantor, 2005-09-22 This study examines how two minorities the Quaker and Anglo Jewish communities engaged with the sciences With their roots in the mid seventeenth century both communities maintained their religious and social norms throughout the eighteenth and nineteenth centuries while standing outside the hegemony of the Anglican Church and being subject to various forms of discrimination Yet for both Quakers and Jews science offered educational and career opportunities and participation in the wider society They adopted their own scientific interests with Quakers being attracted principally to the observational sciences Drawing on a wealth of documentary material much of

which has not been analysed by previous historians Geoffrey Cantor charts the involvement of Quakers and Jews in many different aspects of science scientific research science education science related careers and scientific institutions ranging from the Royal Society to the Great Exhibition

BOOK JACKET The Cambridge Companion to Science and Religion
 Peter Harrison, 2010-06-24 In recent years the relations between science and religion have been the object of renewed attention Developments in physics biology and the neurosciences have reinvigorated discussions about the nature of life and ultimate reality At the same time the growth of anti evolutionary and intelligent design movements has led many to the view that science and religion are necessarily in conflict This book provides a comprehensive introduction to the relations between science and religion with contributions from historians philosophers scientists and theologians It explores the impact of religion on the origins and development of science religious reactions to Darwinism and the link between science and secularization It also offers in depth discussions of contemporary issues with perspectives from cosmology evolutionary biology psychology and bioethics The volume is rounded out with philosophical reflections on the connections between atheism and science the nature of scientific and religious knowledge and divine action and human freedom

Science, Religion, and Mormon Cosmology
 Erich Robert Paul, 1992 Merrill who urged a unique vision of reality that shaped a Mormon eschatology He shows how authorities eventually retreated from the perception of reality as true and adopted a scientifically less secure position in order to protect their theology an eventuality which ultimately resulted in a reactionary response to science within Mormonism

Science, Religion and Nationalism
 Jaume Navarro, Kostas Tampakis, 2024-01-16 Science and Religion have been two major elements in the building of modern nation states While contemporary historiography of science has studied the interactions between nation building and the construction of modern scientific and technological institutions science and religion is still largely based on a supposed universal historiography in which global notions of science and of religion are seldom challenged This book explores the interface between science religion and nationalism at a local level paying attention to the roles religious institutions specific confessional traditions or an undefined notion of religion played in the construction

of modern science in national contexts the use of anti clerical rhetoric as scapegoat for a perceived scientific and technological backwardness the part of religious tropes in the emergence of a sense of belonging in new states the creation of invented traditions that included religious and scientific myths so as to promote new identities the struggles among different confessional traditions in their claims to pre eminence within a specific nation state etc Moreover the chapters in this book illuminate the processes by which religious myths and institutions were largely substituted by stories of progress in science and technology which often contributed to nationalistic ideologies

An Introduction to the Cognitive Science of Religion Claire White, 2021-03-14 In recent decades a new scientific approach to understand explain and predict many features of religion has emerged The cognitive science of religion CSR has amassed research on the forces that shape the tendency for humans to be religious and on what forms belief takes It suggests that religion like language or music naturally emerges in humans with tractable similarities This new approach has profound implications for how we understand religion including why it appears so easily and why people are willing to fight and die for it Yet it is not without its critics and some fear that scholars are explaining the ineffable mystery of religion away or showing that religion is natural proves or disproves the existence of God An Introduction to the Cognitive Science of Religion offers students and general readers an accessible introduction to the approach providing an overview of key findings and the debates that shape it The volume includes a glossary of key terms and each chapter includes suggestions for further thought and further reading as well as chapter summaries highlighting key points This book is an indispensable resource for introductory courses on religion and a much needed option for advanced courses

Asian Religious Responses to Darwinism C. Mackenzie Brown, 2020-12-17 This volume brings together diverse Asian religious perspectives to address critical issues in the encounter between tradition and modern western evolutionary thought Such thought encompasses the biological theories of Charles Darwin Jean Baptiste Lamarck Earnest Haeckel Thomas Huxley and later neo Darwinians as well as the more sociological evolutionary theories of thinkers such as Herbert Spencer Pyotr Kropotkin and Henri Bergson The essays in this volume cover responses from Hindu Jain Buddhist Chinese Japanese and Indo Tibetan Confucian Daoist and Muslim traditions These responses come from the decades immediately after publication of The Origin of Species up to the present with attention being paid to earlier perspectives and teachings within a tradition that have affected responses to Darwinism and western evolutionary thought in general The book focuses on three critical issues the struggle for survival and the moral implications read into it genetic variation and its seeming randomness as related to the problems of meaning and purpose and the nature of humankind and human exceptionalism Each essay deals with one or more of the three issues within the context of a specific tradition

Science and Religion in a Post Colonial World Zainal Abidin Bagir, 2005 This book addresses selected issues in the emerging field of science and religion and at the same time acknowledges the situation of Indonesia or more generally a Third World country as the locus for this discussion The book is concerned with how various world religions in particular

Islam and Christianity respond to shared challenges posed by science as new theories in cosmology physics and the life sciences have brought challenges to many traditional religious ideas There are also more generally epistemological challenges that reflect the recent success of natural science as a mode of inquiry These are felt as problems in both the Western and non Western worlds but with an important difference While the Western world is considered the legitimate owner of modern science some in the Muslim world and the Third World more generally see modern science as a cultural alien imposed on them due to its initial introduction in the colonial period

The Secret Doctrine: The Synthesis of Science, Religion, and Philosophy Volume I: Cosmogogenesis Helena Petrovna Blavatsky, 2018-02-24 The first book in the monumental work of Theosophic thought This book focuses on gaining occult power in the formation of the universe and the cosmos This group sought to learn the secrets of nature science and divinity in order to empower themselves to godhood and this book reveals their secrets as to how knowledge to do this can be attained It does not reveal what the ultimate saving knowledge is that can do this but it gives guidelines on how to start the journey for yourself

Scientific Models for Religious Knowledge Andrew Ralls Woodward, 2018-08-14 Most comparisons of science and religion are really comparisons of science and Christianity or science and Islam and so forth In *Scientific Models for Religious Knowledge* the author aims to get outside typical polarized debates between traditional a priori theism and radical scientistic naturalism Instead a new science and religion compatibility system between a scientific study of religion and a religious epistemology is our new elusive problem Moreover we shall look at a comparison and contrast of modern science with the simple deference of the human mind to the actions of culturally postulated superhuman agents This book pays critical attention to the contributions of scholars in the philosophy of religion the philosophy of science and the scientific study of religion *Scientific Models for Religious Knowledge* is useful for readers looking to expand their learning in the philosophies of science and religion as these subjects are taught and analyzed in modern research universities

What You Don't Know About Religion (but Should) Ryan T. Cragun, 2014-07-01 What is a religion Why are people religious Are religious people more educated than nonreligious people Are religious people more moral more humble or happier Are religious people more or less prejudiced than nonreligious people Is religion good for your health Are people becoming more or less religious Studying religion as a social phenomenon Ryan T Cragun follows the scientific data to provide answers to these and other questions At times irreverent but always engaging and illuminating *What You Don't Know About Religion but Should* is for all those who have ever wondered whether religion helps or hurts society or questioned what the future holds for religion

Imagining the Impossible Karl S. Rosengren, Carl N. Johnson, Paul L. Harris, 2000-05-29 This volume first published in 2000 is about the development of human thinking that stretches beyond the ordinary boundaries of reality Various research initiatives emerged in the decade prior to publication exploring such matters as children's thinking about imaginary beings magic and the

supernatural The purpose of this book is to capture something of the larger spirit of these efforts In many ways this new work offers a counterpoint to research on the development of children s domain specific knowledge about the ordinary nature of things that has suggested that children become increasingly scientific and rational over the course of development In acquiring an intuitive understanding of the physical biological or psychological domains even young children recognize that there are constraints on what can happen However once such constraints are acknowledged children are in a position to think about the violation of those very same constraints to contemplate the impossible Introduction to Christianity Paul Hessert,2020-12-17 Originally published in 1958 Introduction to Christianity considers the nature of Christianity as a life shared in an historical continuing community Divided into five parts the book is a comprehensive interpretation of Christianity as a people created by God s activity in history with a focus on the proclamation of the Gospel It highlights and examines the relevance of Christian doctrine to reflections on the meaning of life and considers the significance of this at a time in which attitudes towards religion are increasingly ambiguous Introduction to Christianity is ideal for those with an interest in the history of Christianity Christian theology and religious philosophy *Wittgenstein and the Cognitive Science of Religion* Robert Vinten,2023-06-15 Advancing our understanding of one of the most influential 20th century philosophers Robert Vinten brings together an international line up of scholars to consider the relevance of Ludwig Wittgenstein s ideas to the cognitive science of religion Wittgenstein s claims ranged from the rejection of the idea that psychology is a young science in comparison to physics to challenges to scientific and intellectualist accounts of religion in the work of past anthropologists Chapters explore whether these remarks about psychology and religion undermine the frameworks and practices of cognitive scientists of religion Employing philosophical tools as well as drawing on case studies contributions not only illuminate psychological experiments anthropological observations and neurophysiological research relevant to understanding religious phenomena they allow cognitive scientists to either heed or clarify their position in relation to Wittgenstein s objections By developing and responding to his criticisms Wittgenstein and the Cognitive Science of Religion offers novel perspectives on his philosophy in relation to religion human nature and the mind *Religion and science, lectures* Joseph Le Conte,1874
