How to Read a Financial Report John A. Tracy, 1980 Publisher description In this brilliant gracefully written and important new book former Secretary of the Interior and Governor of Arizona Bruce Babbitt brings fresh thought to questions of how we can build a future we want to live in We ve all experienced America s changing natural landscape as the integrity of our forests seacoasts and river valleys succumbs to strip malls new roads and subdivisions Too often we assume that when land is developed it is forever lost to the natural world or hope that a patchwork of local conservation strategies can somehow hold up against further large scale development In Cities in the Wilderness Bruce Babbitt makes the case for

why we need a national vision of land use We may have a space program he points out but here at home we don't have an open space policy that can balance the needs for human settlement and community with those for preservation of the natural world upon which life depends Yet such a balance the author demonstrates is as remarkably achievable as it is necessary This is no call for developing a new federal bureaucracy Babbitt shows instead how much can be and has been done by making thoughtful and beneficial use of laws and institutions already in place Babbitt draws on his extensive experience to take us behind the scenes negotiating the Florida Everglades restoration project the largest ever authorized by Congress In California we discover how the Endangered Species Act has been employed to restore regional habitat In the Midwest we see how new World Trade Organization regulations might be used to help restore Iowa's farmlands and rivers As a key architect of many environmental success stories Babbitt reveals how broad restoration projects have thrived through federal state partnerships and how their principles can be extended to other parts of the country In this inspiring and informative book Babbitt offers a vision of land use as grand as the country's natural heritage
