Horse Trading in the Age of Cars Steven M. Gelber,2008-10-01 The trading selling and buying of personal transport has changed little over the past one hundred years Whether horse trading in the early twentieth century or car buying today haggling over prices has been the common practice of buyers and sellers alike Horse Trading in the Age of Cars offers a fascinating study of the process of buying an automobile in a historical and gendered context Steven M Gelber convincingly demonstrates that the combative and frequently dishonest culture of the showroom floor is a historical artifact whose origins lie in the history of horse trading Bartering and bargaining were the norm in this predominantly male transaction with both buyers and sellers staking their reputations and pride on

their ability to negotiate the better deal Gelber comments on this point of sale behavior and what it reveals about American men Gelber's highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century in the process adding a colorful and interesting chapter to the history of the automobile     *The Everything Personal Finance in Your 20s and 30s* Debby Fowles,2008-03-01 A Simon Schuster eBook Simon Schuster has a great book for every reader     *The Science of Money* Brian Tracy,2017-04-28 The subject of money remains one of the most fascinating thought provoking emotional polarizing and well researched subjects in the world Scores of books articles blog posts and speeches have been written on what money is how to earn it how to spend it who has it and who does not and a myriad of other topics related to the effects that it produces Yet despite the content focus and interest on the topic there is one word that describes the average person's views around money confusion It seems that there is so much disinformation what we might call financial white noise that most people either rely on chance for their fortunes they ignore the subject altogether This is not only unnecessary it is a tragedy because of the untapped human potential that is never uncovered when people leave their lives to chance or give up on their dreams It's also totally unnecessary because the topic of money how to create it how to invest it and how to spend it wisely is known Truly there is a science of money just as there is a science of nutrition chemistry and engineering This science of money has been tested and proven again and again And while new theories can arise all the time just as we have new theories for cures for cancer or baldness for example the discipline of science and its rules for testing and verifying results will in short order move these ideas from the realm of theory to one of two categories The Laws of Money that have been proven and can be relied upon as much as you can rely upon the sun rising in the East and setting in the West the The Myths of Money those ideas some of which may still be around just as rumor or innuendo can exist without any basis which claim to be true but which have been tested and disproven or which at best have never been decidedly proven Ultimately this program has one central goal To end all of the confusion once and for all and to present in one comprehensive program the essential truths about money If you simply study the ideas in this program and apply them to your life and your business you will become financially successful as sure as the sun will rise tomorrow
