important region in the world. Significantly, this volume addresses the multiple manifestations of regionalism in Asia and is consequently organised thematically under the headings of conceptualizing the region, economic issues, political issues, strategic issues, regional organizations. As such, the Handbook presents some of the key elements of the competing interpretations of this important and highly contested topic, giving the reader a chance to evaluate not just where Asian regionalism is going but also how the scholarship on Asian regionalism is analysing these trends and events. This book will be an indispensable resource for students and scholars of Asian politics, international relations and regionalism. China's Provinces and the Belt and Road Initiative Dominik Mierzejewski, 2021-03-30. This book discusses the Belt and Road Initiative at the provincial level in China. It analyses the evolution of the role of local governments in Chinese foreign policy since the opening of China's economy in 1978, showing how the provinces initially competed with each other and how the central government was forced to react, developing more centralised policies. Unlike other books on the Belt and Road Initiative which focus on the international aspects of the initiative, this book demonstrates the importance of the Belt and Road in reinforcing China's unitary status and for managing and coordinating development at the local level as well as centre-province relations and province-to-province relations inside China.
