By studying the early splits within Korean nationalism, Michael Robinson shows that the issues faced by Korean nationalists during the Japanese colonial period were complex and enduring. International Organization and Conference Series United States. Department of State, 1970-10. **Narratives of Nation-Building in Korea** Sheila Miyoshi Jager, 2016-07-08. This book offers new insight on how key historical texts and events in Korea's history have contributed to the formation of the nation's collective consciousness. The work is woven around the unifying premise that particular narrative texts, events that extend back to the premodern period, have remained important, albeit transformed, over the modern period and into the contemporary period. The author explores the relationship between gender and nationalism by showing how key narrative topics such as tales of virtuous womanhood have been employed, transformed, and re-deployed to make sense of particular national events. Connecting these narratives and historic events to contemporary Korean society, Jager reveals how these sites or reference points were also successfully re-deployed in the context of the division of Korea and the construction of Korea's modern consciousness.
