Encyclopedia of Hinduism Denise Cush, Catherine A. Robinson, Michael York, 2012-08-21 The Encyclopedia of Hinduism contains over 900 entries reflecting recent advances in scholarship which have raised new theoretical and methodological issues as well as identifying new areas of study which have not been addressed previously. The debate over the term Hinduism in the light of post Orientalist critiques is just one example of how once standard academic frameworks have been called into question. Entries range from 150 word definitions of terms and concepts to 5 000 word in depth investigations of major topics. The Encyclopedia covers all aspects of Hinduism but departs from other works in including more ethnographic and contemporary material in contrast to an exclusively textual and historical approach. It includes a broad range of subject matter such as historical developments among them nineteenth and twentieth century reform and revival geographical distribution especially the diaspora major and minor movements philosophies and theologies scriptures deities temples and sacred sites pilgrimages festivals rites of passage worship religious arts sculpture architecture music dance etc religious sciences e.g. astrology biographies of leading figures local and regional traditions caste and untouchability feminism and women's religion nationalism and the Hindu radical right and new religious movements. The history of study and the role of important scholars past and present are also discussed. Accessibility to all levels of reader has been a priority and no previous knowledge is assumed. However the in depth larger entries and the design of the work in line with the latest scholarly advances means that the volume will be of considerable interest to specialists. The whole is cross referenced and bibliographies attach to the larger entries. There is a full index.

twentieth century      Mysticism Bruno Borchert, 1994-01-01 Mystical experience is not really understood in our modern Western culture but we have a rich history and tradition that can be traced from remote ages to the present day It is a phenomenon common to all religions and races differing in manifestation but sharing a similar foundation 8212the realization from personal experience that all things are interdependent that the source is One The mystical experience is often brief immediate maybe mysterious 8212a last experience that brings all embracing emotion love into the bounds of concrete reality Bruno Borchert brings mysticism into sharp focus by exploring ideas and concepts from world religions and explaining Christian mystics in history in perspective and through art He takes us from Zoroaster to European alchemists explores the Hellenistic world the feminine world view and the experience of God shared by saints and well known mystics such as St Theresa and St Francis Modern approaches explored by psychologists like Jung and Maslow and the contemporary search for mystical love make this a necessary book for people who want to understand the spiritual path      Golden Dreams Kevin Starr, 2011-09-09 A narrative tour de force that combines wide ranging scholarship with captivating prose Kevin Starr's acclaimed multi volume *Americans and the California Dream* is an unparalleled work of cultural history In this volume Starr covers the crucial postwar period 1950 to 1963 when the California we know today first burst into prominence Starr brilliantly illuminates the dominant economic social and cultural forces in California in these pivotal years In a powerful blend of telling events colorful personalities and insightful analyses Starr examines such issues as the overnight creation of the postwar California suburb the rise of Los Angeles as Super City the reluctant emergence of San Diego as one of the largest cities in the nation and the decline of political centrism He explores the Silent Generation and the emergent Boomer youth cult the Beats and the Hollywood Rat Pack the pervasive influence of Zen Buddhism and other Asian traditions in art and design the rise of the University of California and the emergence of California itself as a utopia of higher education the cooling of West Coast jazz freeway and water projects of heroic magnitude outdoor life and the beginnings of the environmental movement More broadly he shows how California not only became the most populous state in the Union but in fact evolved into a mega state en route to becoming the global commonwealth it is today *Golden Dreams* continues an epic series that has been widely recognized for its signal contribution to the history of American culture in California It is a book that transcends its stated subject to offer a wealth of insight into the growth of the Sun Belt and the West and indeed the dramatic transformation of America itself in these pivotal years following the Second World War      *Hindu Spirituality* K. R. Sundararajan, Bithika Mukerji, 2003 The term hindu is referred to the religious life of the people of India and Spirituality understood as wisdom about the way back into the ground of pluralism of religious forms These two volumes are structured along the division between the classical and the postclassical Twenty seven scholars from around the world shed light on the spiritual beauty of Hinduism's poetry art and temples festivals and music as well as the contributions of modern pioneers such as Swami Vivekananda Sri Aurobindo Mahatma Gandhi and others      *Spiritual Atheism* Steve Antinoff, 2010-01-10 Over the

last 160 years a great dilemma has been hatching out of Western spiritual consciousness In our modern existence we have lost faith in the traditional routes by which human beings have come to experience the Divine and an acceptance of oneself as having a place in the order of the universe In Spiritual Atheism Steve Antinoff argues that the dilemma burning within the West has been given its most fundamental expression by Kirilov in Dostoyevsky's *The Possessed* God is necessary and so must exist Yet I know that he doesn't exist and can't exist But don't you understand that a man with two such ideas cannot go on living According to Antinoff spiritual atheism begins with three realizations that our experience of ourselves and our world leaves us ultimately dissatisfied that our dissatisfaction is intolerable and so must be broken through and that there is no God Continuing where such writers as Christopher Hitchens and Sam Harris left off Antinoff's unique and prescient take on deity and spirituality makes this book a critical contribution to the understanding of the quest for salvation and enlightenment in a world full of chaos and need
