Kusaiean Reference Grammar Ki-dong Yi, Lyndon Cornelius, Elmer Asher, 1975 *Composition Linguistique Des Nations Du Monde* Heinz Kloss, Grant D. McConnell, 1981 *Palauan Reference Grammar* Lewis S. Josephs, 1975 Offers a comprehensive description of the Palauan language capturing the essential phonological and grammatical principles unique to the language Morphosyntactic Expression in Functional Grammar Casper de Groot, Kees Hengeveld, 2012-05-02 Morphological and syntactic issues have received relatively little attention in Functional Grammar due to the fact that this grammatical model given its functional orientation was primarily concerned with developing its pragmatic and semantic components Now that these have been solidly developed this book turns to the further development of the syntactic and morphological components of the model Two recent developments receive pride of place Bakker's Dynamic Expression Model and Hengeveld and Mackenzie's Functional Discourse Grammar The first model aims at accounting for the complex interactions that one finds in many languages between the sets of expression rules that have to account for form on the one hand and those that establish order on the other The second model takes a further step by considering morphosyntactic and phonological representations to be part of the underlying structure of the grammar rather than as the output of that grammar contrary to the original assumptions in FG The book accordingly contains synopses of these two proposals as well as applications of these to a variety of linguistic phenomena Further articles provide detailed analyses of a range of semantic and pragmatic categories and their morphosyntactic expression in a wide variety of languages The articles in this book contain data on some 60 different languages including focused articles on phenomena in Arabic Danish English Lengua de Se as Espa ola Mapudungun Plains Cree and Tanggu In all the contributions to this volume show that the issue of morphosyntactic expression in Functional Grammar is very much alive and moving into promising new directions while at the same time contributing to a better understanding of a large number of morphosyntactic phenomena in a wide variety of languages *Pacific Languages in Education* France Mugler, John Lynch, 1996 This collection of articles and interviews explores policy practice and attitudes relating to the use of Pacific languages in education systems of most Pacific Island countries and territories from pre school to tertiary level It records history it deals with current attitudes and prejudices and it focuses attention on perceived problems with the medium of education in many parts of the region Back cover Mokilese Reference Grammar Sheldon P. Constructions Vladimir P. Nedjalkov,2007-11-06 This monograph constitutes the first comprehensive investigation of reciprocal constructions and related phenomena in the world s languages Reciprocal constructions of the type The two boys hit each other The poets admire each other s poems have often been the subject of language particular studies but it is only in this work that a truly global comparative picture emerges Nine stage setting chapters dealing with general and theoretical matters are followed by 40 chapters containing in depth descriptions of reciprocals in individual languages by renowned specialists The introductory papers provide a conceptual and terminological framework that allows the authors of the individual chapters to characterize their languages in comparable terms making it easy for the reader to see points of commonality between languages and constructions that have never been compared before This set of volumes is an indispensable starting point and will be a lasting reference work for any future studies of reciprocals **Currents in**
