Story is an engaging colourful book that gives children permission to discover their unique journey of adoption or kinship The
book s goal is to normalize the questions children have while at the same time normalizing the need to ask them Divided by
activity pages each chapter can be read independently and even out of order in an effort to focus on each child s specific
story This book can help Parents caregivers and other adults involved in the adoption or kinship process to have open honest
discussions with children about their unique stories Birth parents who want to talk about adoption and kinship with birth
children they are not living with It can help children understand their unique story of why they are not living together with
their birth parent s and who their birth family is Professionals who are preparing children for adoption or kinship placements
as well as therapists working with children who are living through adoption or kinship processes Special note to parents
caregivers Designed as a fun way to reinforce the content that you have just read together the activity pages between the

chapters are also a natural way to stop reading if you or the child are feeling overwhelmed This book is more of a journey than a story and sometimes you or your child may need to stay on a chapter until it is comfortable to continue until all the feelings are felt or until all the questions are asked Just like other journeys detours and construction delays are normal and even expected Some families might need to reach out to community resources to help manage their feelings and that is encouraged There are as many ways to read this book as there are butterflies **Legitimizing Life** Sonja van

Wichelen,2018-11-14 The phenomenon of transnational adoption is changing in the age of globalization and biotechnology In *Legitimizing Life* Sonja van Wichelen boldly describes how contemporary justifications of cross border adoption navigate between child welfare humanitarianism family making capitalism science and health Focusing on contemporary institutional practices of adoption in the United States and the Netherlands she traces how professionals bureaucrats lawyers politicians social workers and experts legitimate a practice that became progressively controversial Throughout the past few decades transnational adoption transformed from a humanitarian response to a means of making family In this new manifestation life becomes necessarily economized While push and pull factors demand and supply dynamics and competition between agencies set the stage for the globalization of adoption international conventions scientific knowledge and the language of human rights universalized the phenomenon Van Wichelen argues that such technoscientific legitimations of a globalizing practice are rearticulating colonial logics of race and civilization Yet she also lets us see beyond the biopolitical project and into alternative ways of making kin Angels, Let's Talk 2008-2009 Follow Up Notes Orlando Constantine,2009-01-04
