Marks,2003-08-30 This practical day by day calendar is a goldmine for planning exciting activities and classroom units based on national and international holidays multicultural and historic events famous firsts inventions birthdays of important individuals including authors and more The entries are annotated and include contact information and Web site addresses to facilitate further research and learning In addition three suggested learning activities are provided for each day of the year Designed for any year this one stop resource can be used over and over again as a ready reference daily activity guide rainy day resource or idea generator for bulletin boards Teachers librarians and parents can use the calendar entries and activity suggestions as a springboard to spark interest in a particular topic or event enhance learning and awareness or introduce students to a new unit of study Invaluable to school and public libraries      **Guided Math Conferences** Sammons, Laney,2017-03-01 This professional resource provides teachers with suggestions tips management and implementation methods for using effective conferencing with students within the Guided Math framework Templates planning tools and other resources are provided to help teachers stay organized and effective while conferring      Let's Celebrate Memorial Day Barbara deRubertis,2019-01-16 Read Along or Enhanced eBook On the last Monday of May when spring flowers are in bloom and summer is just around the corner we pause to remember all the brave men and women in our Armed Forces who died while protecting our country our freedoms and us      **Let's Celebrate Columbus Day** Barbara deRubertis,Thomas Sperling,2019-01-16 Read Along or Enhanced eBook This is the story of the famous explorer Christopher Columbus beginning with his childhood dream of being a sailor Depsite his incredible courage and determination Columbus greed caused many problems His voyages never brought him the riches he sought but what he did find was more important than he ever could have imagined      *Burn Math Class* Jason Wilkes,2016-03-22 A manifesto for a mathematical revolution Forget

everything you've been taught about math In Burn Math Class Jason Wilkes takes the traditional approach to how we learn math with its unwelcoming textbooks unexplained rules and authoritarian assertions and sets it on fire Focusing on how mathematics is created rather than on mathematical facts Wilkes teaches the subject in a way that requires no memorization and no prior knowledge beyond addition and multiplication From these simple foundations Burn Math Class shows how mathematics can be re-invented from scratch without preexisting textbooks and courses We can discover math on our own through experimentation and failure without appealing to any outside authority When math is created free from arcane notations and pretentious jargon that hide the simplicity of mathematical concepts it can be understood organically and it becomes fun Following this unconventional approach Burn Math Class leads the reader from the basics of elementary arithmetic to various advanced topics such as time dilation in special relativity Taylor series and calculus in infinite dimensional spaces Along the way Wilkes argues that orthodox mathematics education has been teaching the subject backward calculus belongs before many of its so-called prerequisites and those prerequisites cannot be fully understood without calculus Like the smartest craziest teacher you've ever had Wilkes guides you on an adventure in mathematical creation that will radically change the way you think about math Revealing the beauty and simplicity of this timeless subject Burn Math Class turns everything that seems difficult about mathematics upside down and sideways until you understand just how easy math can be
