Rediscovering Colors M. Watkins,2002-06-30 In Rediscovering Colors A Study in Pollyanna Realism Michael Watkins endorses the Moorean view that colors are simple non reducible properties of objects Consequently Watkins breaks from what has become the received view that either colors are reducible to certain properties of interest to science or else nothing is really colored What is novel about the work is that Watkins unlike other Mooreans takes seriously the metaphysics of colors Consequently Watkins provides an account of what colors are how they are related to the physical properties on which they supervene and how colors can be causally efficacious without the threat of causal overdetermination Along the way he provides novel accounts of normal conditions and non human color properties The book will be of interest to any metaphysician and philosopher of mind interested in colors and color perception Adorable Photographs of Our Baby: Meaningful, Mind Stimulating Activities and More for the Memory Challenged, Their Loved Ones, and Involved Professio Susan Berg,2006-12 Let's Learn Colors & Shapes, Ages 1 - 5 Spectrum,2012-09-01 With Spectrum Let s Learn Colors Shapes toddlers build fine motor skills while learning color and shape recognition This hands on workbook offers step by step instructions for parents working with children ages 2 and up with engaging activities to delight the youngest learners Its 64 full color pages will captivate children while enhancing their fine motor skills and learn important skills necessary for preschool and kindergarten **Color** Kenneth L.
