How To Prolong Life And Postpone Death:

Extending the Human Life Span, 1977 *Palliative care for older people* Lieve Van den Block, Gwenda Albers, Sandra Martins Pereira, Bregje Onwuteaka-Philipsen, Roeline Pasman, Luc Deliens, 2015-05-07 Current projections indicate that by 2050 the number of people aged over 80 years old will rise to 395 million and that by this date 25-30% of people over the age of 85 will show some degree of cognitive decline. *Palliative care for older people* A public health perspective provides a comprehensive account of the current state of palliative care for older people worldwide and illustrates the range of concomitant issues that as the global population ages will ever more acutely shape the decisions of policy makers and care givers. The book begins by outlining the range of policies towards palliative care for older people that are found worldwide. It follows this by examining an array of socio-cultural issues and palliative care initiatives from the care implications of health trajectories of older people to the spiritual requirements of palliative care patients and from the need to encourage compassion towards end of life care within communities to the development of care pathways for older people. *Palliative care for older people* A public health perspective is a valuable resource for professionals and academics in a range of healthcare and public health fields to understand the current state of policy work from around the world. The book also highlights the social-cultural considerations that influence the difficult decisions that those involved in palliative care face not least patients themselves and offers examples of good practice and recommendations to inspire support and direct healthcare policy and decision making at organisational, regional, national and international levels. *The Philosophy of Palliative Care* Fiona Randall, R S Downie, 2006-02-23 The philosophy of palliative care has long remained undisputed by health care professionals and philosophers. This unique book reviews the ethical problems inherent within care of the terminally ill. It suggests a new philosophy statement that could improve clinical care and take the specialty forward. *End-of-life Decision Making* Robert H. Blank, 2005 Experts analyze death-related issues and policies in twelve countries discussing health care costs, advance directives, pain management, cultural, social and religious factors and other topics. **Withholding and Withdrawing Life-prolonging Medical Treatment** British Medical Association, 2008-04-15 An authoritative book on one of the most fundamental and contentious issues for health care professionals. Fully updated to include provisions of the Mental Capacity Act April 2007, the latest policy on advance directives and the impact of the Human Rights Act on such decisions. Provides guidance on the appointment of welfare attorneys to make health care decisions once capacity is lost. Discusses recent cases including Burke baby, MB and Wyatt. Written by medical ethics professionals in consultation with the appropriate medical and legal experts and in agreement with the General Medical Council's guidelines. *Ending Life* Margaret Pabst Battin, 2005-05-05 Margaret Pabst Battin has established a reputation as one of the top philosophers working in bioethics today. This work is a sequel to Battin's 1994 volume *The Least Worst Death*. The last ten years have seen fast-moving developments in end of life issues from the legalization of physician-assisted suicide in Oregon and the Netherlands to furor

over proposed restrictions of scheduled drugs used for causing death and the development of NuTech methods of assistance in dying Battin's new collection covers a remarkably wide range of end of life topics including suicide prevention AIDS suicide bombing serpent handling and other religious practices that pose a risk of death genetic prognostication suicide in old age global justice and the duty to die and suicide physician assisted suicide and euthanasia in both American and international contexts As with the earlier volume these new essays are theoretically adroit but draw richly from historical sources fictional techniques and ample factual material

Aging Interventions And Therapies Suresh I S Rattan, 2005-05-06 This comprehensive volume surveys the molecular cellular hormonal nutritional medical and lifestyle strategies being tested and applied for the prevention intervention and treatment of age related diseases With authoritative contributions not just from researchers in academic institutions and pharmaceutical and cosmeceutical industries but also practicing clinicians of both mainstream and alternative medicine demographers and bioethicists this book provides unique scientific ethical and social perspectives on the discussion of aging intervention In addition the latest technologies in development which will have serious bearings on future aging interventions are reviewed Aging Interventions and Therapies is ideal for graduates and undergraduates in universities and medical and nursing colleges as well as post graduates researching different aspects of aging and anti aging The topics covered are also highly relevant for professionals in the pharmaceutical cosmeceutical nutrition and healthcare industries and practicing clinicians looking for a reliable and up to date resource on aging intervention and therapy

A New Approach to Medicine John Fry, 2012-12-06 Medicine is news There is constant public interest in health and disease in medical miracles and in

breakthroughs in medical disasters failures and malpraxis in deficiencies and defects of health services and in the rising costs of health care. Medicine is big business. Physicians come out near the top money earners in most medical care systems. In the United Kingdom the National Health Service (NHS) now costs over 6000 million a year or 800 million a free service that costs every British man, woman and child 120 a year, 216 in direct and indirect taxes. But this is less than the 500-900 a year that medical care costs each person in USA and West Germany. In developed countries health care costs are approaching 10% of the gross national product (GNP). It is big business also in that in Britain the NHS is one of the largest employers; about 1 million Britons work as employees of the NHS caring for the other 54 millions and in the USA the numbers are 5 million caring for 250 millions. The provision of health services is full of problems and dilemmas. These problems and dilemmas cross all national boundaries. All countries share the same problems and dilemmas: Problems of objectives, standards of effectiveness and efficiency and problems of relations between the medical profession, the public and government. Medical care still is full of mystique.

EBOOK: Death's Dominion: Ethics at the End of Life Simon Woods, 2006-12-16. I enjoyed reading this book very much. It is very readable and well argued using real life cases and thought experiments as well. The book provides the reader with a short history of and an overview of the most important issues in modern palliative care. Various theoretical discussions are clearly set out such as the relationship between the hospice movement and modern palliative care, between palliative care and health care in general, between palliative sedation and euthanasia and the question whether euthanasia can be part of palliative care. The author starts with exploring the existing debates and then develops his own arguments in a balanced and well structured way.

Medicine, Health Care and Philosophy The text of this book is accessible; the philosophical and ethical arguments are clearly articulated and relevant; ethical principles are integrated into the critique of the issues making this a very useful book for nurses working in palliative as well as in general care.

Nursing Ethics It is crucially important for any student or researcher who is seriously considering ethical and policy matters at the end of life to embrace and tackle intellectually the issues that Woods raises in this book. I would happily recommend it.

Journal of Medical Ethics What constitutes a good death? Is it possible to arrange a good death? Is killing compatible with caring? This book looks at death and the issues and ethical dilemmas faced at the end of life. It addresses the central issues in the field such as Withholding and withdrawing treatment, Euthanasia and assisted suicide, Terminal sedation. The role of autonomy. Palliative care. Drawing on a philosophical framework the author explores end of life issues in order to reflect on the nature of the good death and how this may be achieved. The book considers whether it is permissible or desirable to influence the quality of dying, offering palliative sedation as a possible alternative to terminal sedation; the argument is extended to examine why some forms of assisted dying can be shown to be compatible with the ideas of palliative care. Consideration is also given to future developments such as life extension techniques and the ethical questions that these techniques might raise. As such the book follows in the ongoing philosophical tradition to critique and analyse

current thought on the topic of death encouraging self reflection in the reader and offering suggestions for practice in end of life care *Death's Dominion* is key reading for students and professionals involved in care of the dying as well as those with an interest in the philosophical issues surrounding end of life care The Encyclopedia of Aging Richard Schulz, 2006 Print

CourseSmart **Dear Doctor** Marilyn McEntyre, 2021 In the form of an open letter from patients to their doctors spiritual writer and professor of medical humanities Marilyn McEntyre brings to light the hidden fears desperate needs deepest hopes and heartfelt truths that many feel doctors overlook in their approach to health care It's a clarion call for doctors to attend to the whole person and listen deeply rather than rush to assess a set of symptoms And it's a letter that informs doctors of the many things that patients already know about themselves and their health Engaging and candid *Dear Doctor* covers the basics of how patients view their time with doctors how they want doctors to collaborate on health issues and even how patients bring their faith and spirituality to their view of their health and their bodies Ultimately this book is an important first step to begin a dialogue between two communities that often have a very large disconnect **Bearing Witness**

Courtney S. Campbell, 2019-09-09 In *Bearing Witness* Courtney S Campbell draws on his experience as a teacher scholar and a bioethics consultant to propose an innovative interpretation of the significance of religious values and traditions for bioethics and health care The book offers a distinctive exposition of a covenantal ethic of gift response responsibility transformation that informs a quest for meaning in the profound choices that patients families and professionals face in creating sustaining and ending life Campbell's account of bearing witness offers new understandings of formative ethical concepts situates medicine as a calling and vocation rooted in concepts of healing affirms professional commitments of presence for suffering and dying persons and presents a prophetic critique of medical assisted death This book offers compelling critiques of secular models of medical professionalism and of individualistic assumptions that distort the physician patient relationship This innovative interpretation bears witness to the relevance of religious perspectives on an array of bioethical issues from new reproductive technologies to genetics to debates over end of life ethics and bears witness against the oddities of a market oriented and consumerist vision of health care that is especially salient for an era of health care reform Reconceiving Medical Ethics Christopher Cowley, 2012-02-09 This volume of original work comprises a

modest challenge sometimes direct sometimes implicit to the mainstream Anglo American conception of the discipline of medical ethics It does so not by trying to fill the gaps with exotic minority interest topics but by re-examining some of the fundamental assumptions of the familiar philosophical arguments and some of the basic situations that generate the issues The most important such situation is the encounter between the doctor and the suffering patient which forms one of the themes of the book The authors show that concepts such as the body suffering and consent and the role such concepts play within patients lives are much more complicated than the Anglo American mainstream appreciates Some of these concepts have been discussed with subtlety by Continental philosophers like Heidegger Ricoeur and a secondary purpose of the
