ownership and many other personal finance topics Kiplinger's Personal Finance ,2004-07 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics A Piece of the Action Joe Nocera,2013-01-15 Winner of the Helen Bernstein Award for Excellence in Journalism One of Business Week s Ten Best Business Books of the Year When it was published in 1994 A Piece of the Action was wildly acclaimed by Fortune The Wall Street Journal authors Michael Lewis and Brian Burroughs it won the Helen Bernstein Prize and was a national bestseller Joseph Nocera describes the historical process by which millions of middle class Americans went from being savers people who kept their money in the bank and spent it frugally to being unrepentant borrowers and investors A Piece of the Action is an important piece of financial and social history and with a new introduction Nocera s 2013 critique of the uses of the revolution is a powerful warning and admonition to understand what is at stake before we act to look before we jump **Future Babble** Dan Gardner,2010-10-12 In 2008 as the price of oil surged above 140 a barrel experts said it would soon hit 200 a few months later it plunged to 30 In 1967 they said the USSR would have one of the fastest growing economies in the year 2000 in 2000 the USSR did not exist In 1911 it was pronounced that there would be no more wars in Europe we all know how that turned out Face it experts are about as accurate as dart throwing monkeys And yet every day we ask them to predict the future everything from the weather to the likelihood of a catastrophic terrorist attack Future Babble is the first book to examine this phenomenon showing why our brains yearn for certainty about the future why we are attracted to those who predict it confidently and why it s so easy for us to ignore the trail of outrageously wrong forecasts In this fast paced example packed sometimes darkly hilarious book journalist Dan Gardner shows how seminal research by UC Berkeley professor Philip Tetlock proved that pundits who are more famous are less accurate and the average expert is no more accurate than a flipped coin Gardner also draws on current research in cognitive psychology political science and behavioral economics to discover something quite reassuring The future is always uncertain but the end is not always near *The Heavens Are Falling* Walter J. Karplus,2013-11-11 Each day we are bombarded with news of a new catastrophe of worldwide proportions promising to obliterate a part if not all of humankind Confronted with these warnings of impending doom our best defense is to understand how valid or invalid these predictions of calamity are By perceiving these threats in a wise and sagacious way we can best meet future challenges by not earmarking precious resources for wrong or misleading reasons Walter Karplus a professor of computer sciences at UCLA in his 35 years of experience has made predictions for all kinds of phenomena by generating models and computer simulations His decades of experience have taught him what we can and cannot predict with any accuracy Dr Karplus surveys the most hotly debated catastrophes that many scientists have predicted will imminently endanger the lives of countless people all over the globe These catastrophes include the depletion of the ozone layer the Greenhouse Effect nuclear radiation acid rain the AIDS epidemic the population explosion another Great Depression and earthquakes Drawing on his superb background

he assesses the strengths and weaknesses of arguments propounding the seriousness of these calamities All the while he never allows us to lose sight of the profound shortcomings of scientific prediction In his singularly engaging manner Dr Karplus traces the fascinating art of prediction from our earliest ancestors to today He pronounces at what point prediction even within science becomes a black art He elucidates the problems that computer simulations have in predicting events and goes on to pinpoint when and where these models lapse into the area of pure conjecture Through reason and wit Walter Karplus teaches us how to bring a trained eye to the predictions of disaster that unceasingly assault us The Heavens Are Falling is an illuminating and entertaining work that bestows on us the wisdom to make informed judgments before taking arms against a sea of troubles Pound Foolish Helaine Olen,2013-12-31 If you ve ever bought a personal finance book watched a TV show about stock picking listened to a radio show about getting out of debt or attended a seminar to help you plan for your retirement you ve probably heard some version of these quotes What s keeping you from being rich In most cases it is simply a lack of belief SUZE ORMAN The Courage to Be Rich Are you latte ing away your financial future DAVID BACH Smart Women Finish Rich I know you re capable of picking winning stocks and holding on to them JIM CRAMER Mad Money They re common refrains among personal finance gurus There s just one problem those and many simi lar statements are false For the past few decades Americans have spent billions of dollars on personal finance products As salaries have stagnated and companies have cut back on benefits we ve taken matters into our own hands embracing the can do attitude that if we re smart enough we can overcome even daunting financial obstacles But that s not true In this meticulously reported and shocking book journalist and former financial columnist Helaine Olen goes behind the curtain of the personal finance industry to expose the myths contradictions and outright lies it has perpetuated She shows how an industry that started as a response to the Great Depression morphed into a behemoth that thrives by selling us products and services that offer little if any help Olen calls out some of the biggest names in the business revealing how even the most respected gurus have engaged in dubious even deceitful prac tices from accepting payments from banks and corporations in exchange for promoting certain prod ucts to blaming the victims of economic catastrophe for their own financial misfortune Pound Foolish also disproves many myths about spending and saving including Small pleasures can bankrupt you Gurus popular ized the idea that cutting out lattes and other small expenditures could make us millionaires But reduc ing our caffeine consumption will not offset our biggest expenses housing education health care and retirement Disciplined investing will make you rich Gurus also love to show how steady investing can turn modest savings into a huge nest egg at retirement But these calculations assume a healthy market and a lifetime without any setbacks two conditions that have no connection to the real world Women need extra help managing money Product pushers often target women whose alleged financial ignorance supposedly leaves them especially at risk In reality women and men are both terrible at han dling finances Financial literacy classes will prevent future eco nomic crises Experts like to claim mandatory sessions on personal finance in school will cure

many of our money ills Not only is there little evidence this is true the entire movement is largely funded and promoted by the financial services sector Weaving together original reporting interviews with experts and studies from disciplines ranging from behavioral economics to retirement planning Pound Foolish is a compassionate and compelling book that will change the way we think and talk about our money **Kartchner Caverns** Neil Miller, 2008 Tells how amateur Arizona spelunkers Randy Tufts and Gary Tenen found a huge virgin cave in 1974 maintained the secrecy of this place Kartchner Caverns for fourteen years and upon its discovery helped preserve the location and transform the caverns into a public attraction The author covers the twenty five years from the caverns discovery to its protection as an Arizona state park using personal interviews biographical facts political maneuvering and geological facts to illustrate the story
