Korean Workers The Culture And Politics Of Class Formation:

Korean Workers Hagen Koo, 2018-09-05 Forty years of rapid industrialization have transformed millions of South Korean peasants and their sons and daughters into urban factory workers Hagen Koo explores the experiences of this first generation of industrial workers and describes its struggles to improve working conditions in the factory and to search for justice in society The working class in South Korea was born in a cultural and political environment extremely hostile to its development Koo says Korean workers forged their collective identity much more rapidly however than did their counterparts in other newly industrialized countries in East Asia This book investigates how South Korea's once docile and submissive workers reinvented themselves so quickly into a class with a distinct identity and consciousness Based on sources ranging from workers' personal writings to union reports to in depth interviews this book is a penetrating analysis of the South Korean working class experience Koo reveals how culture and politics simultaneously suppressed and facilitated class formation in South Korea With chapters exploring the roles of women students and church organizations in the struggle the book reflects Koo's broader interest in the social and cultural dimensions of industrial transformation

Privilege and Anxiety Hagen Koo, 2022-07-15 In *Privilege and Anxiety* Hagen Koo examines what has happened to the Korean middle class in the era of neoliberal globalization and demonstrates that global economic change brought more profound changes than mere economic decline and shrinking size to this class Globalization has inserted an axis of polarization into the middle class separating a small minority that benefits from the globalized economy from the large majority that suffers from it This internal differentiation generates a challenging dynamic within Korean society as the newly affluent seek to distinguish themselves from the rest of the middle class to establish a new privileged class position *Privilege and Anxiety* explores how these tensions play out in three areas consumption and lifestyle residential differentiation and education In all three areas the dominant orientation of the affluent middle class is to preserve their newfound privilege and to pass it onto their children Their new class practices Koo argues bring great anxiety to both the winners and losers of neoliberal globalization

Organizing at the Margins Jennifer Jihye Chun, 2011-08-11 The realities of globalization have produced a surprising reversal in the focus and strategies of labor movements around the world After years of neglect and exclusion labor organizers are recognizing both the needs and the importance of immigrants and women employed in the growing ranks of low paid and insecure service jobs In *Organizing at the Margins* Jennifer Jihye Chun focuses on this shift as it takes place in two countries South Korea and the United States Using comparative historical inquiry and in depth case studies she shows how labor movements in countries with different histories and structures of economic development class formation and cultural politics embark on similar trajectories of change Chun shows that as the base of worker power shifts from those who hold high paying industrial jobs to the formerly unorganizable labor movements in both countries are employing new strategies and vocabularies to challenge the assault of neoliberal globalization on workers rights and livelihoods Deftly combining theory and ethnography she argues that by cultivating alternative sources of symbolic leverage that root workers demands in the collective morality of broad based communities as opposed to the narrow confines of workplace disputes workers in the lowest tiers are transforming the power relations that sustain downgraded forms of work Her case studies of janitors and personal service workers in the United States and South Korea offer a surprising comparison between converging labor movements in two very different countries as they refashion their relation to historically disadvantaged sectors of the workforce and expand the moral and material

boundaries of union membership in a globalizing world **Women in the Sky** Hwasook Nam, 2021-08-15 Winner of the 2023 John K Fairbank Prize and the 2023 James B Palais Prize *Women in the Sky* examines Korean women factory workers century long activism from the 1920s to the present with a focus on gender politics both in the labor movement and in the larger society It highlights several key moments in colonial and postcolonial Korean history when factory women commanded the attention of the wider public including the early 1930s rubber shoe workers general strike in Pyongyang the early 1950s textile workers struggle in South Korea the 1970s democratic union movement led by female factory workers and women workers activism against neoliberal restructuring in recent decades Hwasook Nam asks why women workers in South Korea have been relegated to the periphery in activist and mainstream narratives despite a century of persistent militant struggle and indisputable contributions to the labor movement and successful democracy movement *Women in the Sky* opens and closes with stories of high altitude sit ins a phenomenon unique to South Korea beginning with the rubber shoe worker Kang Churyong s sit in in 1931 and ending with numerous others in today s South Korean labor movement including that of Kim Jin Sook In *Women in the Sky* Nam seeks to understand and rectify the vast gap between the crucial roles women industrial workers played in the process of Korea s modernization and their relative invisibility as key players in social and historical narratives By using gender and class as analytical categories Nam presents a comprehensive study and rethinking of the twentieth century nation building history of Korea through the lens of female industrial worker activism *Gender and Labour in Korea and Japan* Ruth Barraclough, Elyssa Faison, 2009-09-10 Bringing together for the first time sexual and industrial labour as the means to understand gender work and class in modern Japan and Korea this book shows that a key feature of the industrialisation of these countries was the associated development of a modern sex labour industry Tying industrial and sexual labour together the book opens up a range of key questions In what economy do we place the labour of the former comfort women Why have sex workers not been part of the labour movements of Korea and Japan Why is it difficult to be working class and feminine What sort of labour hierarchies operate in hostess clubs How do financial crises translate into gender crises This book explores how sexuality is inscribed in working class identities and traces the ways in which sexual and labour relations have shaped the cultures of contemporary Japan and Korea It addresses important historical episodes such as the Japanese colonial industrialisation of Korea wartime labour mobilisation women engaged in forced sex work for the Japanese army throughout the Asian continent and issues of ethnicity and sex in the contemporary workplace The case studies provide specific examples of the way gender and work have operated across a variety of contexts including Korean shipyard unions Japanese hostess clubs and the autobiographical literature of Korean factory girls Overall this book provides a compelling account of the entanglement of sexual and industrial labour throughout the twentieth century and shows clearly how ideas about gender have contributed in fundamental ways to conceptions of class and worker identities **The Failure of Socialism in South Korea** Yunjong Kim, 2015-07-03 Despite the fact that socialist parties

have proved to be a major political force across the world this has not been the case in Asian countries Socialism in South Korea is a quintessential example of this failure Despite the existence of a socialist party and what would seem to be the right conditions for development the Korean socialist tendency has failed to become a meaningful force in politics This book explores why and under what conditions Korean socialism has failed to develop into a social democrat movement in the post war period Within the context of the integration of structural and agency factors it goes beyond the generally accepted view that the left failed because of suppression by the state and proffers that the real reason why socialism failed lay with its inability to develop beyond revolutionary socialism and build a more pragmatic social democracy that could develop a broad alliance within Korean society Also drawing on examples from Western Europe and Latin America where left wing forces have achieved power this book will be of huge interest not only to students and scholars of Asian and Korean politics but also socialism comparative and international politics alike

Handbook of Religion and the Asian City Peter van der Veer, 2015-05-19 Handbook of Religion and the Asian City highlights the creative and innovative role of urban aspirations in Asian world cities It points out that urban politics and governance are often about religious boundaries and processions in short that public religion is politics The essays show how projects of secularism come up against projects and ambitions of a religious nature a particular form of contestation that takes the city as its public arena Asian cities are sites of speculation not only for those who invest in real estate but also for those who look for housing for employment and for salvation In its potential and actual mobility the sacred creates social space in which they all can meet Handbook of Religion and the Asian City makes the comparative case that one cannot study the historical patterns of urbanization in Asia without paying attention to the role of religion in urban aspirations Provided by publisher

South Korean Social Movements Gi-Wook Shin,Paul Y Chang,2011-06-01 This book explores the evolution of social movements in South Korea by focusing on how they have become institutionalized and diffused in the democratic period The contributors explore the transformation of Korean social movements from the democracy campaigns of the 1970s and 1980s to the rise of civil society struggles after 1987 South Korea was ruled by successive authoritarian regimes from 1948 to 1987 when the government decided to re establish direct presidential elections The book contends that the transition to a democratic government was motivated in part by the pressure from social movement groups that fought the state to bring about such democracy After the transition however the movement groups found themselves in a qualitatively different political context which in turn galvanized the evolution of the social movement sector Including an impressive array of case studies ranging from the women s movement to environmental NGOs and from cultural production to law the contributors to this book enrich our understanding of the democratization process in Korea and show that the social movement sector remains an important player in Korean politics today This book will appeal to students and scholars of Korean studies Asian politics political history and social movements
