Korean Arts Volume 1 Painting Sculpture:

Taekyon: The Korean Martial Art Michael DeMarco, 2016-10-25 When people discuss Korean martial arts they rarely mention taekyon. They are usually totally unfamiliar with the name because there hasn't been much written about it. The four chapters in this anthology give an excellent overview of taekyon as a system noted for its dance-like qualities and combative style, especially for leg techniques. Taekyon stands unique as it represents most closely to a pure Korean martial tradition. Chapter one by Stanley Henning gives a detailed overview of martial arts in Korea. From the beginning, Korean martial arts were intertwined with those of China. Even the historical references to Korean martial arts are all in Chinese. The author concludes that traditional Korean martial arts are but a vague memory with taekyon being the sole survivor. In the next chapter, Robert Young skillfully presents what is known about taekyon. With over 150 years of verifiable history, taekyon is the most thoroughly documented of Korean martial arts. Its skills and techniques greatly differ from those of other modern Korean styles. It is the only plausible candidate for the descendant of ancient subak. This well-researched chapter includes theory and techniques and a lineage chart. Dr. Willy Pieter expands upon the historical development of Korean martial sports as presented by Young. There is an emphasis on the hwarang flower boy and their presence in Korean culture and martial traditions in particular. The etymology of Korean martial systems are questioned. The final chapter by Yung Ouyang offers a fuller picture of what taekyon represents as a moving art. Traditionally, taekyon was a game as well as a martial art, so many did not credit taekyon for its combative elements. It has largely been ignored by those interested in the fighting arts. It is gaining recognition as a legitimate heir to the traditional Korean martial arts but is also undergoing influences from Japanese traditions and Western sports. Taekyon deserves to be recognized for its uniqueness among the martial arts of Asia. This anthology will serve as solid reference for all interested in the Korean combative traditions and especially taekyon for its aesthetic appeal as a form of dance and graceful yet powerful combative method.

Foundations of Korean Martial Arts: Masters, Manuals and Combative Techniques Michael DeMarco, M.A., et al., 2017-01-29 Most of what are referred to as Korean martial art styles are actually derived from Japanese Okinawan karate systems or find their roots in Chinese boxing. The Korean peninsula has existed as a fragile territory between China and Japan and thus shared many cultural elements from their neighbors. To what degree has the Japanese and Chinese arts influenced those practiced in Korea over the centuries? Can we distinguish any original Korean martial art style? Chapters in this anthology are derived from the *Journal of Asian Martial Arts* specifically in response to such questions as asked above. The authors provide great detail on the military martial manuals that recorded both battlefield arts and personal combative arts and use these sources to give a picture of the martial traditions practiced in Korea for hundreds of years. In chapter one, Stanley Henning provides an excellent overview of martial arts in Korea since the earliest dynasties. These include bare hand arts as well as those with weaponry. His overview illuminates the time and place of highly influential military manuals as discussed in the chapter by Manuel Adrogu. John Della

Pia's two chapters focus on a particular manual the *Muye Dobo Tongji* 1790 providing details of open hand and weapons training in particular with the unique Korean native sword Two chapters provide the theory and practice of qigong methods for health and martial effectiveness Dr Patrick Massey et al offer results on the use of breathing methods affecting lung capacity Sean Bradley's chapter goes deeply into the medical theories that parallel the practice of Sinmoo Hapkido's qigong methods The final two chapters focus on practical fighting applications from Hapkido Marc Tedeschi's chapter provides sound advice for self defense against multiple opponents In addition to detailing principles that give any defender a helpful advantage Tedeschi shows nineteen examples of techniques against two three and four opponents that include pressure point striking throws arm bars locks and a variety of kicks In the closing chapter Sean Bradley discusses a few of his favorite techniques where he learned them and why they are memorable Rich in historical details and practical advice this anthology will prove to be a prized reference work to all interested in the Korean martial traditions *Korean Art since 1945:*
