## **Lessons Of The British War Economy:**

**Lessons of the British War Economy** Sir Daniel Norman Chester, 1951      **Lessons of the British War Economy** Sir Daniel Norman Chester, 1951      War, Economy and Society, 1939-1945 Alan S. Milward, 1979 This remarkable book should be the standard work for a long time A true comparative study it relates the experience of all the main countries and sometimes others to a series of key issues that are deftly analyzed and not just described In addition to the basics production consumption food finance and organization the book deals with such famous themes as war as the bringer of growth and stimulus to technology and such special questions as the exploitation of occupied areas and economic warfare Throughout Professor Milward of Manchester relates economics to strategy in an illuminating way Foreign Affairs An admirable state of the arts report on what we know about how agriculture population technology labor industrial production and public finance were affected by the war He also sets out some highly challenging findings concerning the rationale and effectiveness of economic strategy as applied by the main powers And he has tentatively advanced some large concepts about the nature of advanced economies as revealed by the manner in which they strove to cope with the war His approach is broadly comparative he gives us an account not only of the relative economic performance of individual European powers but also of the Japanese and American war economies plus a few observations on the situation in many smaller countries from Australia to Yugoslavia The book is a mine of information and arresting concepts American Historical Review Milward displays an impressive mastery of his material both from a historical and economic point of view He uses quantification effectively but the book can be read with ease and pleasure by those who are neither trained in nor interested in econometrics Lucidly written this superb work deserves a much wider audience than merely specialists Journal of Economic Literature Milward's portrayal of events operates on the proposition that strategic decisions cannot be understood apart from the economic considerations which each leader or government had to take into account a permanent contribution to our understanding of World War II Henceforth it will be hard to escape his contention that the big battalions that counted were those on the production line Journal of Interdisciplinary History      **Lessons of the British War Economy Ed. by D. N. Chester** D. N. Chester, 1951      **The Economics of World War II** Mark Harrison, 2000-06-26 This book provides a new quantitative view of the wartime economic experiences of six great powers the UK the USA Germany Italy Japan and the USSR What contribution did economics make to war preparedness and to winning or losing the war What was the effect of wartime experiences on postwar fortunes and did those who won the war lose the peace A chapter is devoted to each country reviewing its economic war potential military economic policies and performance war expenditures and development while the introductory chapter presents a comparative overview The result of an international collaborative project the volume aims to provide a text of statistical reference for students and researchers interested in international and comparative economic history the history of World War II the history of economic policy and comparative economic systems It embodies

the latest in economic analysis and historical research      **Lessons of the British War Economy. Edited by D. N. Chester** Sir Daniel Norman Chester, 1951      **A World at Total War** Roger Chickering, Stig Förster, Bernd Greiner, German Historical Institute (Washington, D.C.), 2005 This volume presents the results of a conference on the history of total war      **Economic History of Warfare and State Formation** Jari Eloranta, Eric Golson, Andrei Markevich, Nikolaus Wolf, 2016-09-19 This edited volume represents the latest research on intersections of war state formation and political economy i.e. how conflicts have affected short and long run development of economies and the formation or destruction of states and their political economies The contributors come from different fields of social and human sciences all featuring an interdisciplinary approach to the study of societal development The types of big issues analyzed in this volume include the formation of European and non European states in the early modern and modern period the emergence of various forms of states and eventually modern democracies with extensive welfare states the violent upheavals that influenced these processes the persistence of dictatorships and non democratic forms of government and the arrival of total war and its consequences especially in the context of twentieth century world wars One of the key themes is the dichotomy between democracies and dictatorships namely what were the origins of their emergence and evolution why did some revolutions succeed and other fail and why did democracies on the whole emerge victorious in the twentieth century age of total wars The contributions in this book are written with academic and non academic audiences in mind and both will find the broad themes discussed in this volume intuitive and useful      **Arms, Economics and British Strategy** G. C. Peden, 2007-02-08 This book integrates strategy technology and economics and presents a new way of looking at twentieth century military history and Britain's decline as a great power G C Peden explores how from the Edwardian era to the 1960s warfare was transformed by a series of innovations including dreadnoughts submarines aircraft tanks radar nuclear weapons and guided missiles He shows that the cost of these new weapons tended to rise more quickly than national income and argues that strategy had to be adapted to take account of both the increased potency of new weapons and the economy's diminishing ability to sustain armed forces of a given size Prior to the development of nuclear weapons British strategy was based on an ability to wear down an enemy through blockade attrition in the First World War and strategic bombing in the Second and therefore power rested as much on economic strength as on armaments      **Economic Planning in the British Building Industry, 1945-1949** Nathan Rosenberg, 2016-11-11 This volume undertakes the examination and appraisal of the economic controls employed by the British Labor Government in attempting to regulate the output of the building industry in the years immediately following the Second World War An unfortunate consequence of earlier preoccupation with purely income generating aspects of investment activity was that insufficient consideration was given to the allocation of investment resources It was precisely this latter problem however which became a matter of major concern to the Labor Government Its building program in the postwar years is examined here with particular reference to the program's peculiar structure and organization and the

availability of building workers and materials Discussion also covers the Government's administrative machinery for regulating building demand and for determining the uses to which building resources were put as well as the priorities which the Government attempted to impose upon the industry and the consequences of specific policy decisions which were made in attempting to enforce these priorities The British experience during the years between 1945 and 1949 provides numerous insights into the requirements and the problems associated with centralized planning of the operation of a private industry The attempt to regulate the building industry is of increasing relevance in view of the growing recognition that nationalization is no panacea and that government planning must be more and more concerned with influencing the behavior of privately operated industries The importance of the present study is further enhanced by the fact that it deals with a strategic investment goods industry which must inevitably play a major role in the current and future development planning of underdeveloped countries This work therefore is of special interest to economists concerned with the problems of government economic planning Moreover because of its strong focus upon the organizational and administrative aspects of government planning Economic Planning in the British Building Industry is of vital interest to political scientists and all students of public administration

**A Guide to the Sources of British Military History** Robin H Igham, 2015-10-05 Designed to fill an overlooked gap this book originally published in 1972 provides a single unified introduction to bibliographical sources of British military history Moreover it includes guidance in a number of fields in which no similar source is available at all giving information on how to obtain access to special collections and private archives and links military history especially during peacetime with the development of science and technology Mod Brit: An Econ & Soc Hist A. Digeon, H. Servajean, 1952

**British Macroeconomic Policy since 1940** Jim Tomlinson, 2014-06-03 Originally published in 1985 Jim Tomlinson charts the route of British macroeconomic policy in the post war era This book argues that the objectives of macroeconomic policy have not been constant that the emphasis has shifted from one item to another over time and that this uncertainty and inconsistency over objectives goes a long way to explaining why macroeconomics management has not been a startling success The Era of World War II Louise A. Arnold-Friend, 1979

**The Reason why** Thomas Christiansen, 2012 This book analyses the influence of Francoist policy on agricultural output in the 1939-55 period The focus is on the wheat olive and wine sectors and special attention is given to small scale farmers Agrarian policy for wheat and olive oil included pricefixing production quotas and rationing of consumption Producers and consumers circumvented intervention by creating a black market When earnings from the black market are included value of output per unit of land remained close to pre war levels It is then concluded that the decrease in wheat output was caused by lack of draught animals and fertilisers rather than state intervention Intervention in the wheat sector was therefore desirable from a social viewpoint but the system could have been improved significantly Average olive oil output only fell below the pre war level immediately after the war Consequently state intervention was unnecessary after 1942-43 and could have been

abolished long before it was finally done in 1952 In the wine sector policy aimed at increasing farm prices rather than decreasing consumer prices Table wine consumption declined after the war but this was counteracted by higher demand for high alcohol white wine for the production of brandy and industrial alcohol Consequently the analysis shows that similar kinds of intervention led to quite different result in terms of production as demonstrated in the cases of wheat and olives On the other hand different types of intervention led to similar results in production for olives and vines *The Labour Party and the Planned Economy, 1931-1951* Richard Toye, 2003 An exploration of Labour's 1931 pledge to create a planned socialist economy and the reasons for its failure to do so In the general election of 1931 the Labour Party campaigned on the slogan Plan or Perish The party's pledge to create a planned socialist economy was a novelty and marked the rejection of the gradualist evolutionary socialism to which Labour had adhered under the leadership of Ramsay MacDonald Although heavily defeated in that election Labour stuck to its commitment The Attlee government came to power in 1945 determined to plan comprehensively Yet the aspiration to create a fully planned economy was not met This book explores the origins and evolution of the promise in order to explain why it was not fulfilled RICHARD TOYE lectures in history at Homerton College Cambridge

**Austerity in Britain** Ina Zweiniger-Bargielowska, 2000-05-04 Austerity in Britain is the first book to explore the entire episode of rationing austerity and fair shares from 1939 until 1955 These policies were central to the British war effort and to post war reconstruction The book analyses the connections between government policy consumption gender and party politics during and after the Second World War The economic background to austerity the policy's administration and changes in consumption standards are examined Rationing resulted in at times extensive black markets and popular attitudes to the policy ranged from wartime acquiescence to post war discontent Austerity in Britain qualifies the myth of common sacrifice on the home front and highlights the limitations of the fair shares policy which failed to achieve genuine equality between classes or between men and women The continuation of rationing and austerity policies after 1945 was central to party politics Disaffection particularly among women undermined Labour's popularity while the Conservatives critique of austerity was instrumental to the party's victories at the general elections of 1951 and 1955 Routledge Library Editions: Housing Policy & Home Ownership Various, 2021-08-31 Originally published between 1961 and 1994 the volumes in this set sit equally comfortably in sociology and geography as well as housing studies Even though they were published some years ago their content continues to offer critical engagement with an evolving policy agenda which is even more important in a time of crisis and deeper polarization both nationally and globally as a result of the pandemic They Provide a comprehensive political economic analysis of the historical origins and 20th Century experience of 19th and 20th Century housing tenure in the UK France Germany the former USSR Israel Denmark Sweden Hungary Puerto Rico and the USA Discuss landlord tenant relations and the neglect of particular disadvantaged groups such as the elderly the single homeless and those in low income groups Examine the balance between rehabilitation and redevelopment and the rise and fall of the high rise flat Cover issues

such as rent controls subsidies and urban renewal Look at the implications of selling council houses and evaluate the impact of the growth of home ownership in the UK Address the practical and political difficulties of devising measures which meet policy objectives

**Britain and 1940** Malcolm Smith, 2014-04-04 1940 was the most significant year in European history this century For Britain it was the finest hour the beginning of the People's War Britain and 1940 explores what the year meant for the people of Britain then and now Covering the pre history of 1940 in Britain Malcolm Smith explores the great fear that a second world war would perhaps mean the end of British civilization and charts the development of the myths of Dunkirk the Battle of Britain and the Blitz and the great influence they have had on our national consciousness and on attitudes to the outside world The book presents students of British history with a panorama of the influences that have constructed national consciousness around a crucial moment in British history

*The Management of Technical Change* A. Booth, 2006-11-14 This book examines the management of technical change in manufacturing and services through an explicit political economic framework It examines the management of automation in Britain and America since 1950 and it applies the same useful framework to explore the impact of Japanization on both Britain and the US in the 1980s and 1990s
