Rayman, 2012-07-15 The sublime is the experience of what is great in power, size or number Historically from ancient times to the present this aesthetic experience has always been associated with morality but in order to exclude evil, fascistic or terroristic uses of the sublime we require a systematic justification of the claim that there are internal moral constraints on the sublime The author argues that Immanuel Kant alone provides this account binding sublimity to moral ideas the exhibition of freedom the production of respect and violence toward inclinations *The Socius of Architecture* Ad Graafland, 2000 Tripartite investigation of architecture, urbanism and design proposals Critical analysis, sociological research and architectural projects Critical position regarding the possibility of architecture to engage in the current socio-political discourse Analysis of the Kunsthal in Rotterdam and IJ Bank and Westerdok projects of the Dutch architect Rem Koolhaas Description of the cities of Amsterdam, Rotterdam and Tokyo Design proposal for architectural projects and urban research

Order and Disorder Jonathan Dunsby, 2004 Order and Disorder is the result of the first International Orpheus Academy for Music Theory held in 2003 Its theme was 20th century music and theory especially after the 1950s Five guest lecturers discussed theoretical, historical and philosophical aspects of this theme in six articles In Music Analytical Trends of the Twentieth Century Jonathan Dunsby discusses key features in the development of music analysis from prestructuralist to postmodern times Joseph N. Straus describes different ways in which intervallic and motivic ideas of the musical surface in atonal music are projected over larger spans Yves Knockaert investigates the controllability of non-intention in Cage's work the compositional approach of Morton Feldman's floating thoughts and the raw state of Wolfgang Rihm's music of the 1980s In Nature and the Sublime the Politics of Order and Disorder in Twentieth Century Music Max Paddison exposes a history of the concept of nature in relation to music with some references to literature and the visual arts Konrad Boehmer analyses

several aspects of the political economy of music in *Music and Politics In Towards a Terza Prattica* he focuses on the perspectives of the paradigmatic change which electric music has caused **Identity Anecdotes** Meaghan Morris, 2006-07-07 Meticulously attentive to the complex nuances and intricacies of what is too easily glossed as cross cultural communication these essays offer us a unique writerly perspective on what it takes socially and textually to reconcile the requirements of an effective shared discourse cultural studies with the intrinsic heterogeneity of our divergent glocal realities an awesomely satisfying and enlightening read Ian Ang University of Western Sydney How is identity produced in global textual environments What forms of narrative generate solidarity in a world in which globalization and trans nationality can often appear to be a *fait accompli* This brilliant coruscating book written by one of the most formidable and original thinkers in cultural studies examines questions of nationality identity the use of anecdote to build solidarity and the role of institutions in shaping culture Ranging across many fields including film and media gender nationality globalization and popular culture it provides a mind clearing exercise in recognizing what culture is and how it works today Illustrated with a fund of relevant and insightful examples it addresses the central questions in cultural studies today identity post identity the uses of narrative and textual analysis the industrial organization of solidarity and the opportunities and dilemmas of globalization Penetrating arresting and inimitable the book is a major contribution to the field of cultural studies It is of interest to students of cultural studies media film and cultural sociology Karl Rahner's Theological Aesthetics Peter Joseph Fritz, 2014 This innovative book discloses Karl Rahner's foremost achievement discovering and delineating an ethos of Catholicism a multi faceted and comprehensive approach to life in Christ Karl Rahner's *Theological Aesthetics* does so by placing the German Jesuit and his teacher philosopher Martin Heidegger into a richly detailed dialogue on aesthetics The book treats classic Rahner topics such as anthropology and Christology But it breaks new ground by exploring themes such as angels Mary and the apocalypse juxtaposed with analogous philosophical topics in Heidegger *Murakami Haruki* Michael Seats, 2009-01-01 This book offers a new approach to dealing with Murakami's radical narrative project by demonstrating how his first and later trilogies utilize the structure of the simulacrum a second order representation to develop a complex critique of contemporary Japanese culture **The Concept of the Beautiful** Agnes Heller, 2012 The main purpose of this book is to explicate the problematic relationship between the heterogeneity of what is experienced as beautiful and the homogeneity of the conceptualization of that experience or attempt at such a conceptualization in the era of modern philosophy While the heterogeneity of what is experienced as beautiful was permitted and indeed celebrated in the dominant ancient conception for example in the Symposium and Phaedrus of Plato the need for homogenization in the later appropriation of Plato and in the Enlightenment period relegated the beautiful to the privileged domain of artworks In her analysis Agnes Heller provides a unique and significant emphasis on the original life content of the experience of the beautiful which becomes lost in the modern system of the arts This book details the history of the concept of the beautiful

starting with what Agnes Heller distinguishes between the warm metaphysics of beauty and the cold one inspired by Plato's Janus-faced relationship to beauty and ending with a fragmented yet hopeful vision propagated by Friedrich Nietzsche, Walter Benjamin and Theodor W. Adorno among others. In between these two historical parentheses the metaphysical Plato on one hand and the post-metaphysical Nietzsche, Benjamin and Adorno on the other hand lay a plenitude of figures and intellectual developments all of which contributed to the demise of the concept of the beautiful in the Western metaphysical tradition. The most important of these figures and developments are examined in this book.

Traversals of Affect Julie Gaillard, Claire Nouvet, Mark Stoholski, 2016-04-21 This volume traces the topic of affect across Lyotard's corpus and accounts for Lyotard's crucial and original contribution to the thinking of affect. Highlighting the importance of affect in Lyotard's philosophy, this work offers a unique contribution to both affect theory and the reception of Lyotard. Affect indeed traverses Lyotard's philosophical corpus in various ways and under various names: figure or the figural in *Discourse*, Figure unbound intensities in his libidinal writings, the feeling of the *différend* in *The Differend*, affect and *infantia* in his later writings. Across the span of his work, Lyotard insisted on the intractability of affect on what he would later call the *differend* between affect and articulation. The singular awakening of sensibility, affect both traverses and escapes articulation, discourse and representation. Lyotard devoted much of his attention to the analysis of this traversal of affect in and through articulation, its transpositions, translations and transfers. This volume explores Lyotard's account of affect as it traverses the different fields encompassed by his writings: philosophy, the visual arts, the performing arts, literature, music, politics, psychoanalysis, as well as technology and post-human studies.

Denis Edwards in His Own Words ATF Press, 2020-05-01 Denis Edwards was a theologian concerned with the science and religion discourse and eco-theology. He died in March 2019. This book is a collection of his till now unpublished talks and essays.

Kierkegaard, Religion and the Nineteenth-Century Crisis of Culture George Pattison, 2002-07-04 Kierkegaard is often viewed in the history of ideas solely within the academic traditions of philosophy and theology. The secondary literature generally ignores the fact that he also took an active role in the public debate about the significance of the modern age that was taking shape in the flourishing *feuilleton* literature during the period of his authorship. Through a series of sharply focussed studies, George Pattison contextualises Kierkegaard's religious thought in relation to the debates about religion, culture and society carried on in the newspapers and journals read by the whole educated stratum of Danish society. Pattison brings Kierkegaard into relation to not only high art and literature but also to the ephemera of his contemporary culture. This has important implications for our understanding of Kierkegaard's view of the nature of religious communication in modern society.

East - West Dialogues in Philosophy Engin Yurt, *Studies of Art Aesthetics and Phenomenology* In here there are five studies that work under the thematic title *East West Dialogues*. Each study, while on one side they focus on a matter that fits the context of their own title, on the other side they try to problematize, reconstruct within and solve an aspect of the 21st-century phenomenology in this manner of double

investigation makes studies important and useful for the course of history of phenomenology has This manner of double investigation makes the studies important and useful for the course of history of phenomenology by testing its limits and horizons In here by also through the problematization of the phenomenological horizon this can be said it has been tried to carry phenomenology to its next stage or open it in an intellectual and philosophical East West encounter Without succeeding or failing it even the enterprise itself holds essential insight about the path ahead of the phenomenology Nietzsche one said I imagine future thinkers in whom European American indefatigability is combined with the hundred fold inherited contemplativeness of the Asians such a combination will bring the riddle of the world to a solution Maybe with the help of these studies by attaining a bigger picture every reader might have the chance to realize what Nietzsche and others imagined and wished for Of course the whole combination that Nietzsche talked about surely takes more than thousands of companions and hundreds of years in the making But it would be more than enough for this text to at least contribute the process of the combination

Melancholic Freedom David Kyuman Kim, 2007-06-25 Why does agency the capacity to make choices and to act in the world matter to us Why is it meaningful that our intentions have effects in the world that they reflect our sense of identity that they embody what we value What kinds of motivations are available for political agency and judgment in an age that lacks the enthusiasm associated with the great emancipatory movements for civil rights and gender equality What are the conditions for the possibility of being an effective agent when the meaning of

democracy has become less transparent David Kyuman Kim addresses these crucial questions by uncovering the political moral philosophical and religious dimensions of human agency Kim treats agency as a form of religious experience that reflects implicit and explicit notions of the good Of particular concern are the moral political and religious motivations that underpin an understanding of agency as meaningful action Through a critical engagement with the work of theorists such as Judith Butler Charles Taylor and Stanley Cavell Kim argues that late modern and postmodern agency is found most effectively at work in what he calls projects of regenerating agency or critical and strategic responses to loss Agency as melancholic freedom begins and endures Kim maintains through the moral and psychic losses associated with a broad range of experiences including the moral identities shaped by secularized modernity and the multifold forms of alienation experienced by those who suffer the indignities of racial gender class and sexuality discrimination and oppression Kim calls for renewing the sense of urgency in our political and moral engagements by seeing agency as a vocation where the aspiration for self transformation and the human need for hope are fundamental concerns

Multicultural Dialogue Randi Gressgård, 2010 As cross cultural migration increases democratic states face a particular challenge how to grant equal rights and dignity to individuals while recognizing cultural distinctiveness In response to the greater number of ethnic and religious minority groups state policies seem to focus on managing cultural differences through planned pluralism This book explores the dilemmas paradoxes and conflicts that emerge when differences are managed within this conceptual framework After a critical investigation of the perceived logic of identity indicative of Western nation states and at the root of their pluralistic intentions the author takes issue with both universalist notions of equality and cultural relativist notions of

distinctiveness. However, without identity, is it possible to participate in dialogue and form communities? Is there a way out of this impasse? The book argues in favor of communities based on nonidentitarian difference, developed and maintained through open and critical dialogue.
