A Lethal Fixation Stella Shepherd,1993      Lethal Politics R. J. Rummel,2017-07-05 While there are estimates of the number of people killed by Soviet authorities during particular episodes or campaigns until now no one has tried to calculate the complete human toll of Soviet genocides and mass murders since the revolution of 1917 Here R J Rummel lists and analyzes hundreds of published estimates presenting them in the historical context in which they occurred His shocking conclusion is that conservatively calculated 61 911 000 people were systematically killed by the Communist regime from 1917 to 1987 Rummel divides the published estimates on which he bases his conclusions into eight historical periods such as the Civil War collectivization and World War II The estimates are further divided into agents of death such as terrorism deportations and famine Using statistical principles developed from more than 25 years of quantitative research on nations he analyzes the estimates In the collectivization period for example about 11 440 000 people were murdered During World War II while the Soviet Union had lost almost 20 000 000 in the war the Party was killing even more of its citizens and foreigners probably an additional 13 053 000 For each period he defines counts and totals the sources of death He shows that Soviet forced labor camps were the major engine of death probably killing 39 464 000 prisoners overall To give meaning and depth to these figures Rummel compares them to the death toll from major wars world disasters global genocide deaths from cancer and other diseases and the like In these and other ways Rummel goes well beyond the bare bones of statistical analysis and tries to provide understanding of this incredible toll of human lives Why were these people killed What was the political and social context How can we understand it These and other questions are addressed in a compelling historical narrative This definitive book will be of interest to Soviet experts those into      **History of Research on Nitrogen Fixation in Soybeans (1887-2018)** William Shurtleff; Akiko Aoyagi,2018-11-26 This is the world s most comprehensive well documented and well illustrated book on this subject With extensive subject and geographical index 91 photographs and illustrations mostly color Free of charge      Music, Masculinity and the Claims of History Dr Ian Biddle,2013-01-28 What does it mean to think of Western Art music and the Austro German contribution to that repertory as a tradition How are men and masculinities implicated in the shaping of that tradition And how is the writing of the history or histories of that tradition shaped by men and masculinities This book seeks to answer these and other questions by drawing both on a wide range of German language writings on music sound and listening from the so called long nineteenth century circa 1800 1918 and a range of critical theoretical texts from the post war continental philosophical and psychoanalytic traditions including Lacan i ek Serres Derrida and Kittler The book is focussed in particular on bringing the object of historical writing itself into scrutiny by engaging in what i ek has called a historicity or a way of writing about the past that not merely acknowledges the ahistorical kernel of historical writing but brings that kernel into the light of day takes account of it and puts it into play The book is thus committed to a kind of historical writing that is open ended though not ideologically na ve and that does not fix

or stabilize the nature of the relationship between so called primary and secondary texts The book consists of an introduction which places the study of classical music and the Austro German tradition within broader debates about the value of that tradition and four extensive case studies an analysis of the cultural historical category of listening around 1800 a close reading of A B Marx s Beethoven monograph of 1859 a consideration of Heinrich Schenker s attitudes to the mob and the vernacular more broadly and an examination through Franz Kafka of the figure of Mahler s body Hope and History Vincent Harding,2009 From the sit ins and freedom marches of the sixties to the election of Barack Obama the story and lessons of a great journey of hope and transformation **Mechanisms of Life History Evolution** Thomas Flatt,Andreas Heyland,2011-05-12 This interdisciplinary volume unites evolutionary and molecular biologists from various fields life history theory molecular biology developmental biology aging phenotypic plasticity social behaviour and endocrinology who use studies of molecular mechanisms to solve fundamental questions in life history evolution in a variety of organisms

within tree species is one of the basic issues facing foresters biologists and others who work with trees Genetic differences among and within populations of these trees become important considerations when forests are regenerated artificially by seeding and planting and when new species are introduced in forestry agroforestry or for ornamental and landscape purposes Geographic Variation in Forest Trees is the first book to examine this subject from a world wide perspective Following a historical review the author discusses population genetic theory and genetic systems of native North American tree species as they interact with environments in the major climatic regions in the world He then demonstrates how this knowledge is used to guide seed zoning and seed transfer in silviculture basing much of his discussion on models developed in Scandinavia and North America In the final chapter the author addresses the issue of genetic conservation a subject of great concern in the face of accelerated forest destruction industrial pollution and climatic change This comprehensive well researched book makes a significant contribution to the knowledge of one of our most important renewable natural resources
