contact between generations Sometimes it can offer a path for healing divided communities and those with traumatic memories Without it the history and sociology of our time would be poor and narrow In this fourth edition of his pioneering work fully revised with Joanna Bornat Paul Thompson challenges the accepted myths of historical scholarship He discusses the reliability of oral evidence in comparison with other sources and considers the social context of its development He looks at the relationship between memory the self and identity He traces oral history through its own past and weighs up the recent achievements of a movement which has become international with notably strong developments in North America Europe Australia Latin America South Africa and the Far East despite resistance from more conservative academics This new edition combines the classic text of *The Voice of the Past* with many new sections including especially the worldwide development of different forms of oral history and the parallel memory boom as well as discussions of theory in oral history and of memory trauma and reconciliation It offers a deep social and historical interpretation along with succinct practical advice on designing and carrying out a project *The Voice of the Past* remains an invaluable tool for anyone setting out to use oral history and life stories to construct a more authentic and balanced record of the past and the present

environmental medical technical and cultural factors that determined the chronology and nature of early reform The comparative approach between the coal and metalliferous mining sectors provides a useful model for exploring the significance of organized labour in gaining health and safety concessions particularly as the miners in the metalliferous sector in contrast to the colliers who unionised early placed a high value on independence and self sufficiency in the workplace As an investigation into the formation of health and safety legislation in a major industry this work will be valuable to all those with an interest in medical history occupational health legal history and the social history of work in the nineteenth century
