*Introducing Bert Williams* Camille F. Forbes, 2008-08-01 It is not hard to argue that every black performer in show business owes something to Bert Williams Discovered in California in 1890 by a minstrel troupe manager Williams swiftly became a regular player in the troupe Traveling on from the rough and ready medicine shows that then dotted the West he rose through the ranks of big time vaudeville in New York City and finally ascended to the previously all white pinnacle of live stage success the fabled Ziegfeld Folies on Broadway In spite of his triumphs he brought the first musical with an all black cast to Broadway in 1903 he was often viewed by the black community with more critical suspicion than admiration because of his controversial decision to perform in blackface Modest private and conservative in his personal life Williams left political activism and soapbox thumping to others More than the simple narration of a remarkable life *Introducing Bert*

Introduction A young man comes to his doctor and complains of painful sores around his genitals During the inquiry the doctor finds out that he had unprotected sex with his partner while he was on vacation a month earlier After a thorough examination the doctor concludes that he is suffering from a sexually transmitted disease STD called herpes Herpes is a sexually transmitted disease common in sexually active individuals According to stats of the United States Center for Disease Control and Prevention CDC the reported cases of herpes are highest among any other sexually transmitted disease According to the 2008 report of CDC sexually transmitted diseases affect 19.7% of individuals in the United States per year Herpes account for more than half of the reported cases of STDs To be more precise herpes affects more than 14 million individuals in the United States each year Out of these cases most of the affected population more than 49% belongs to the age group of 15-24 years The stats are truly alarming right Whenever someone talks about sexually transmitted diseases the first thing that comes to mind is AIDS AIDS is a potentially lethal condition with no known cure This leads to a misconception that whatever spreads through sex is supposed to be incurable and lethal But this is not true Although herpes can cause serious complications it is not incurable It can be diagnosed and treated with a 100% success rate What would you do if you get herpes The first option that might come to mind while suffering from a herpes infection is going to a physician But this is not a good choice because of two reasons First it's going to cost you A LOT Second you'll have to eat a handful of medicines each day and medicines have a lot of side effects ranging from minor to severe What other choice do I have then you might ask Who needs to see a Doctor when all you need to do is search your kitchen or pantry or go to the super market for natural herpes cures Confused Read on to get your questions answered Here's some good news You don't need to go to your Doctor and waste your time and money There are natural methods that can do the trick for you All these methods are cost effective safe to use and guess what you can try these methods all by yourself Yes home remedies herbs and natural cures have side effects too but only if taken in high excess and if you don't follow the instructions or listen carefully or discuss these with your practitioner This book will provide easy achievable steps you can take with none of the vague technical terms that won't help Read on to know everything you need to know about herpes its origin signs and symptoms and natural cures

*Cancer in Children* International Union against Cancer, 2013-06-29 With the fall in mortality from infectious diseases the impact of childhood cancer in the Western World has increased to become the second commonest cause of death in the age group 1-14 years being surpassed only by accidents However even in those countries in which paediatric cancer is attracting increasing interest the disease is relatively uncommon and the number of cases seen by any one physician even in a large general hospital is often limited to one or two a year The widely held view by parents and even by many doctors that cancer in childhood is usually untreatable and inevitably fatal is no longer tenable With

improvement in the therapeutic response or in the actual survival rates of children with such lesions as Wilms tumour brain tumours rhabdomyosarcomas Ewing s sarcoma retinoblastoma lym phoma and even leukaemia there is a real hope of achieving a substantial reduction in the mortality of childhood cancer Paediatric oncology is in fact providing a vigorous stimulus to the much wider field of cancer treatment and research and is demonstrating the advantages of a multi disciplinary cooperation in the management of this disease *Medical Science Abstracts and Reviews* ,1924

**Black Men and Depression** John Head, 2010-04-07 A call to action shedding light on the issue of depression in black men and the barriers that prevent too many from seeking and receiving care Rosalynn Carter former U S First Lady and chairperson The Carter Center Mental Health Task Force In mainstream society depression and mental illness are still somewhat taboo subjects in the black community they are topics that are almost completely shrouded in secrecy As a result millions of black men are suffering in silence or getting treatment only in extreme circumstances in emergency rooms homeless shelters and prisons The neglect of emotional disorders among men in the black community is nothing less than racial suicide In this groundbreaking book veteran journalist and award winning author John Head argues that the problem can be traced back to the time of slavery when it was believed that blacks were unable to feel inner pain because they had no psyche This myth has damaged generations of African American men and their families creating a society that blames black men for being violent and aggressive without considering that depression might be a root cause *Black Men and Depression* challenges the African American community and the psychiatric community to end the suffering of black men and address what can be done by loved ones to help those who need it most Previously published as *Standing in the Shadows* *Bad Humor* Kimberly Anne Coles, 2022-04-19 Race in the early modern period is a concept at the crossroads of a set of overlapping concerns of lineage religion and nation In *Bad Humor* Kimberly Anne Coles charts how these concerns converged around a pseudoscientific system that confirmed the absolute difference between Protestants and Catholics guaranteed the noble quality of English blood and justified English colonial domination Coles delineates the process whereby

religious error first resident in the body becomes marked on the skin Early modern medical theory bound together psyche and soma in mutual influence By the end of the sixteenth century there is a general acceptance that the soul s condition as a consequence of religious belief or its absence could be manifest in the humoral disposition of the physical body The history that this book unfolds describes developments in natural philosophy in the early part of the sixteenth century that force a subsequent reconsideration of the interactions of body and soul and that bring medical theory and theological discourse into close even inextricable contact With particular consideration to how these ideas are reflected in texts by Elizabeth Cary John Donne Ben Jonson William Shakespeare Edmund Spenser Mary Wroth and others Coles reveals how science and religion meet nascent capitalism and colonial endeavor to create a taxonomy of Christians in Black and White The Reproductive Rights Reader Nancy Ehrenreich,2008 Publisher Description
