Lethal Heritage Michael A. Stackpole, Roger Loveless, 1995 In this first book in a trilogy the warring interstellar empires of the Inner Sphere face the greatest threat of their lives an invasion by the technologically superior Clans It falls to the leaders of the Five Successor States to save their people from ultimate destruction

*BattleTech Legends: Lethal Heritage* Michael A. Stackpole, 2018-10-23 A DANGEROUS NEW ENEMY APPROACHES Two decades after the events that nearly brought the Successor States to the brink of all out war the Great Houses exist in an uneasy peace But now from out beyond the Periphery comes a new threat A swift moving military force of unknown origin Nothing the Inner Sphere has can stop them Their power speed and ferocity are unparalleled Some of the finest warriors and ablest units have challenged them and been crushed No force has faced them and won They are the Clans A military juggernaut whose sole reason for existence is battle A race that selectively breeds itself for combat Humanity's only hope is an alliance of mortal enemies The Federated Commonwealth and the Draconis Combine interstellar empires at war for 300 years must now stand side by side or face certain destruction

*Stones and Lives* Helen Frowe, Derek Matravers, 2024-06-18 The fate of heritage in war has attracted considerable attention in recent years due in no small part to ISIS's campaign of destruction across the Middle East and in 2012 the International Criminal Court's first prosecution of heritage destruction as a war crime Regular armed forces have been criticised for both failing to protect and damaging heritage sites In response heritage organisations urge the better implementation of existing international laws on heritage protection in war This book argues that any such law or policy will require combatants to choose between safeguarding heritage and safeguarding other goods including human life It thus challenges the view repeatedly expressed by heritage professionals that the choice between protecting heritage and protecting lives is a false dichotomy Existing international law not only implies such choices but also more worryingly gives no indication of how they should be resolved Drawing on contemporary work on the ethics of war this book develops an account of the permissible protection of heritage in war It argues that heritage is not morally special rather heritage is one of many goods that contribute to individuals' lives going well and that we routinely trade off against each other By drawing on these more familiar dilemmas we can make progress on how to balance the protection of heritage against risks to human life Amongst other things the book considers the different ways in which heritage might contribute to individual flourishing the role of consent in justifying the imposition of risk on combatants and civilians the permissibility of

forcefully defending heritage and what if anything could compensate for the loss of heritage in war **Geographies of Post-Industrial Place, Memory, and Heritage** Mark Alan Rhodes II, William R. Price, Amy Walker, 2020-11-23 All industrialization is deeply rooted within the specific geographies in which it took place and echoes of previous industrialization continue to reverberate in these places through to the modern day This book investigates the overlap of memory and the impacts of industrialization within today's communities and the senses of place and heritage that grew alongside and in reaction to the growth of mines mills and factories The economic and social change that accompanied the unchecked accumulation of wealth and exploitation of labor as the industrial revolution spread throughout the world has numerous lasting impacts on the socioeconomics of today Likewise the planet itself is now reeling The memory and heritage of these processes reach into the communities that owe the industrial revolution their existence but these populations also often suffered adverse impacts to their health and environment through the large scale and rapid extraction of natural resources and production of goods Through the themes of memory community and place working post industrial landscapes and the de romanticization of industrial pasts this book examines the endurance and decline of these communities the spatial processes of industrial byproducts and the memory and heritage of industrialization and its legacies While based in the traditions of geography this collection also draws upon and will be of great interest to students and scholars of cultural anthropology archaeology sociology history architecture civil engineering and heritage memory museum and tourism studies Using global examples the authors provide a uniquely geographic understanding to industrial heritage across the spaces places and memories of industrial development **The New World** Michael A.
