A Theology for Artisans of a New Humanity, Volume 5 Juan L. Segundo,2011-05-13 A THEOLOGY FOR ARTISANS OF A NEW HUMANITY Volume 1 The Community Called Church Volume 2 Grace and the Human Condition Volume 3 Our Idea of God Volume 4 The Sacraments Today Volume 5 Evolution and Guilt For many generations Christians have considered sin almost exclusively in terms of the individual person my sins and your sins These sins moreover have been thought to have their roots in our fallen human nature the consequence of original sin Recently however the bishops and theologians of Latin America have begun to speak of sinful structures sinful institutions and even sinful societies These terms sound rather strange to North American ears but an understanding of them is vital if Christians here are to live up to their calling to be both prophetic and creative agents for change within their communities global as well as national These communities are scarred by sinful structures and sinful institutions if we but had the eyes to see them as they are For the love taught and lived by Christ has a creative obligation in Segundo s phrase the obligation to move evolution forward into ever more truly human forms and structures I have come to give life and that more abundantly Segundo s reflections on the nature and meaning of that life make Evolution and Guilt a signal contribution to pastoral as well as political theology It is paramount however a breakthrough in Christian moral theology speaking to the major issues of our times

The Social Pathologies of Contemporary Civilization Kieran Keohane, 2016-03-03. The Social Pathologies of Contemporary Civilization explores the nature of contemporary malaises, diseases, illnesses, and psychosomatic syndromes, examining the manner in which they are related to cultural pathologies of the social body. Multi-disciplinary in approach, the book is concerned with questions of how these conditions are not only manifest at the level of individual patients' bodies but also how the social bodies politic are related to the hegemony of reductive biomedical and individualistic perspectives. Rejecting a reductive biomedical and individualistic diagnosis of contemporary problems of health and well-being, The Social Pathologies of Contemporary Civilization contends that many such problems are to be understood in the light of radical changes in social structures and institutions extending to deep crises in our civilization as a whole. Rather than considering such conditions in isolation, both from one another and from broader contexts, this book argues that health and well-being are not just located at the level of the individual body, the integral human person, or even collective social bodies; rather, they encompass the health of humanity as a whole and our relationship with Nature. A ground-breaking analysis of social malaise and the health of civilization, this book will be of interest to scholars of sociology, social theory, social psychology, philosophy, and anthropology.

The Big Lies of School Reform Paul C. Gorski, Kristien Zenkov, 2014-03-14. The Big Lies of School Reform provides a critical interruption to the ongoing policy conversations taking place around public education in the United States today. By analyzing the discourse employed by politicians, lobbyists, think tanks, and special interest groups, the authors uncover the hidden assumptions that often underlie popular statements about school reform and demonstrate how misinformation or half-truths have been used to reshape public education in ways that serve the interests of private enterprise. Through a thoughtful series of essays that each identify one lie about popular school reform initiatives, the authors of this collection reveal the concrete impacts of these falsehoods, from directing funding to shaping curricula to defining student achievement. Luminary contributors including Deborah Meier, Jeannie Oakes, Gloria Ladson Billings, and Jim Cummins explain how reform movements affect teachers and administrators and how widely accepted mistruths can hinder genuine efforts to keep public education equitable, effective, and above all, truly public. Topics covered include common core standards, tracking, alternative paths to licensure, and the disempowerment of teachers' unions. Beyond critically examining the popular rhetoric, the contributors offer visions for improving educational access, opportunity, and outcomes for all students and educators and for protecting public education as a common good.

Rethinking Education and Poverty William G. Tierney, 2015-11-01. How can new ways of thinking about education improve the lives of poor students? In *Rethinking Education and Poverty*, William G. Tierney brings together scholars

from around the world to examine the complex relationship between poverty and education in the twenty first century International in scope this book assembles the best contemporary thinking about how education can mediate class and improve the lives of marginalized individuals In remarkably nuanced ways this volume examines education s role as both a possible factor in perpetuating and a tool for alleviating entrenched poverty Education has long been seen as a way out of poverty Some critics however argue that educational systems mask inequality and perpetuate cycles of poverty and wealth others believe that the innate resilience or intellectual ability of impoverished students is what allows those individuals to succeed Rethinking Education and Poverty grapples in turn with the ramifications of each possibility Throughout these compelling far reaching and provocative essays the contributors seek to better understand how local efforts to reduce poverty through education interact or fail to interact with international assessment efforts They take a broad historical view examining social economic and educational policies from the postWorld War II period to the end of the Cold War and beyond Although there is no simple solution to inequality this book makes clear that education offers numerous exciting possibilities for progress
