The Letter of Petrus Peregrinus on the Magnet, A.D. 1269 Pierre (de Maricourt),1904 **The Letter of Petrus Peregrinus on the Magnet, A.D. 1269** Petrus Peregrinus,2020-09-28 The poet Claudian 365 408 A D wrote a short idyll on the attractive virtue of the lodestone and its symbolism St Augustine 354 430 in his work De Civitate Dei records the fact that a lodestone held under a silver plate draws after it a scrap of iron lying on the plate Abbot Neckam the Augustinian 1157 1217 distinguishes between the properties of the two ends of the lodestone and gives in his De Utensilibus what is perhaps the earliest reference to the mariner s compass that we have Albertus Magnus the Dominican 1193 1280 in his treatise De Mineralibus enumerates different kinds of natural magnets and states some of the properties commonly attributed to them the minstrel Guyot de Provins in a famous satirical poem written about 1208 refers to the directive quality of the lodestone and its use in navigation as do also Cardinal de Vitry in his Historia Orientalis 1215 1220 Brunetto Latini poet orator and philosopher in his Tr sor des Sciences a veritable library written in Paris in 1260 Raymond Lully the Enlightened Doctor in his treatise De Contemplatione begun in 1272 and Guido Guinicelli the poet priest of Bologna who died in 1276 The authors of these learned works were too busy with the pen to find time to devote to the close and prolonged study of natural phenomena necessary for fruitful discovery and so had to content themselves with recording and discussing in their tomes the scientific knowledge of their age without making any notable additions to it But this was not the case with such contemporaries of theirs as Roger Bacon the Franciscan and his Gallic friend Pierre de Maricourt commonly called Petrus Peregrinus the subject of the present notice a man of academic culture and of a practical rather than speculative turn of mind Of the early years of Peregrinus nothing is known save that he studied probably at the University of Paris and that he graduated with the highest scholastic honors He owes his surname to the village of Maricourt in Picardy and the appellation Peregrinus or Pilgrim to his having visited the Holy Land as a member of one of the crusading expeditions of the time In 1269 we find him in the engineering corps of the French army then besieging Lucera in Southern Italy which had revolted from the authority of its French master Charles of Anjou To Peregrinus was assigned the work of fortifying the camp and laying mines as well as of constructing engines for projecting stones and fire balls into the beleaguered city It was in the midst of such warlike preoccupations that the idea seems to have occurred to him of devising a piece of mechanism to keep the astronomical sphere of Archimedes in uniform rotation for a definite time In the course of his work over the new motor Peregrinus was gradually led to consider the more fascinating problem of perpetual motion itself with the result that he showed at least diagrammatically and to his own evident satisfaction how a wheel might be driven round forever by the power of magnetic attraction **LETTER OF PETRUS PEREGRINUS ON** De Maricourt 13th Cent Pierre,Brother B. 1868 Arnold,2016-08-27 *The Letter of Petrus Peregrinus on the Magnet, A. Pull Of History, The: Human Understanding Of Magnetism And Gravity Through The Ages Yoshitaka Yamamoto,2017-12-28 This book seeks to understand what bring to pass the birth of modern physics by focusing upon the formation of the concept of force This would be the first book to note the important role magnetism has played in

this process Indeed the force between celestial bodies before the introduction of the Isaac Newtonian gravitational force is first introduced by Johannes Kepler by analogy with the magnetic force Moreover this book by concentrating our attention on the magnetism fully describes the developments and the recognition of the force concept during the Middle Ages The detailed description of the Middle Ages and the Renaissance is a strong point of this book By discussing and emphasizing on the role accomplished by the magnetic force this book makes clear the connection between the natural magic and the modern experimental physics This book will open up a new aspect of the birth of modern physics The Letter of Petrus Peregrinus on the Magnet, A.D. 1269 Arnold Pierre, 2017-08-22

The Innovators Behind Leonardo Plinio Innocenzi, 2018-06-27 This engaging book places Leonardo da Vinci's scientific achievements within the wider context of the rapid development that occurred during the Renaissance It demonstrates how his contributions were not in fact born of isolated genius but rather part of a rich period of collective advancement in science and technology which began at least 50 years prior to his birth Readers will discover a very special moment in history when creativity and imagination were changing the future shaping our present They will be amazed to discover how many technological inventions had already been conceived or even designed by the engineers and inventors who preceded Leonardo such as Francesco di Giorgio and Taccola the so called Siena engineers This engaging volume features a wealth of illustrations from a variety of original sources such as manuscripts and codices enabling the reader to see and judge for him or herself the influence that other Renaissance engineers and inventors had on Leonardo **Among Our Books** Carnegie Library of Pittsburgh, 1905
