empirical investigation of how national courts react to disputes involving international organizations Through comprehensive analysis of the attitudes and techniques of national courts and underlying political motives Professor Reinisch first describes various legal approaches that result in adjudication or non adjudication of disputes concerning international organizations Secondly he discusses policy issues pro and contra the adjudication of such disputes His study then scrutinizes the rationale for immunizing international organizations from domestic litigations especially the functional need for immunity and substantially debates the implications of a human rights based right of access to court on immunizing international organizations against national jurisdictions Finally he identifies contemporary trends seeking to ascertain whether a more flexible principle exempting certain types of disputes from domestic adjudication might substitute for the traditional immunity concept which would simultaneously guarantee the functioning and independence of international organizations without impairing private parties access to a fair dispute settlement procedure      *American Economic Association Quarterly*

,1909      **Evolving Constitutions of International Organizations** Tetsuo Sato,2023-09-14 This book analyzes the law creating process relating to the interpretation of constituent instruments of international organizations This topic is one of the key issues concerning the structures and activities of international organizations It differs from other books in the field by suggesting that under the influences of the inherent dynamism of international organizations the interpretative framework of their constituent instruments is not the same as that of ordinary treaties It also concludes that the interpretation of the constituent instruments of international organizations deviates from the interpretative framework regulated by the law of treaties as codified by the Vienna Convention on the Law of Treaties The book will be of prime interest to academics in the fields of international law and international organization and treaty law      International Organizations Revisited Dennis Dijkzeul,Dirk Salomons,2021-08-13 Despite the sustained scholarly attention that the United Nations and international NGOs have received in the twenty first century they still remain under researched from a management studies perspective This

volume brings together rich analyses of these organizations functioning arguing that they are best understood as intermediaries between international decision making and funding bodies in the developed world and initiatives that take place on the ground primarily in the Global South Based on current management research this follow up to Rethinking International Organizations Berghahn 2002 provides a wealth of both empirical and theoretical insights along with practical recommendations how these organizations can function more effectively
