Democracy and War David L. Rousseau,2005-03-24 Conventional wisdom in international relations maintains that democracies are only peaceful when encountering other democracies Using a variety of social scientific methods of investigation ranging from statistical studies and laboratory experiments to case studies and computer simulations Rousseau challenges this conventional wisdom by demonstrating that democracies are less likely to initiate violence at early stages of a dispute Using multiple methods allows Rousseau to demonstrate that institutional constraints rather than peaceful norms of conflict resolution are responsible for inhibiting the quick resort to violence in democratic polities Rousseau finds that conflicts evolve through successive stages and that the constraining power of participatory institutions can vary across these stages Finally he demonstrates how constraint within states encourages the rise of clusters of democratic states that

resemble zones of peace within the anarchic international structure **Reference Books Bulletin, 1987-1988** Sandy Whiteley, Rbb Editorial Board, 2011-11 The Future Catches Up Ralph M. Goldman, 2002-07-09 Professor Goldman has contributed articles and books in diverse fields of political science. This is a partial collection of his principal published and unpublished journal articles as well as brief references to his principal books. Volume I focuses on the emergence of transnational political parties. His researches have led Goldman to conclude that transnational parties are the precursors of a world party system and that a world party system will become the institutional alternative to international warfare. In the near term prospects of transnational party development he traces the methods and consequences of international collaborations among national parties and the implications of transnational party developments for the Democratic and Republican parties of the United States. Many of his forecasts came to fruition two or three decades after they were made hence the title of this collection The Future Catches Up **GLOBAL SECURITY AND INTERNATIONAL POLITICAL ECONOMY - Volume VI** P.
