**The Oxford Guide to Library Research** Thomas Mann, 2005-10-27 Publisher Description      **Belonging to the Nation**

John J. Kulczycki, 2016-03-28 In 1939 Nazis identified Polish citizens of German origin and granted them legal status as ethnic Germans of the Reich After the war Poland did just the opposite searched out Germans of Polish origin and offered them Polish citizenship John Kulczycki's account underscores the processes of inclusion and exclusion that mold national communities      *World Encyclopedia of Peace* Javier Pérez de Cuéllar, Yŏng-sik Cho, 1999      The North American Folk Music Revival: Nation and Identity in the United States and Canada, 1945-1980 Gillian Mitchell, 2016-02-17 This work represents the first comparative study of the folk revival movement in Anglophone Canada and the United States and combines this with discussion of the way folk music intersected with and was structured by conceptions of national affinity and national identity Based on original archival research carried out principally in Toronto Washington and Ottawa it is a thematic rather than general study of the movement which has been influenced by various academic disciplines including history musicology and folklore Dr Gillian Mitchell begins with an introduction that provides vital context for the subject by tracing the development of the idea of the folk folklore and folk music since the nineteenth century and how that idea has been applied in the North American context before going on to examine links forged by folksong collectors artists and musicians between folk music and national identity during the early twentieth century With the boom of the revival in the early sixties came the ways in which the movement in both countries proudly promoted a vision of nation that was inclusive pluralistic and eclectic It was a vision which proved compatible with both Canada and America enabling both countries to explore a diversity of music without exclusiveness or narrowness of focus It was also closely linked to the idealism of the grassroots political movements of the early 1960s such as integrationist civil rights and the early student movement After 1965 this inclusive vision of nation in folk music began to wane While the celebrations of the Centennial in Canada led to a re emphasis on the Canadianness of Canadian folk music the turbulent events in the United States led many ex revivalists to turn away from politics and embrace new identities as introspective singer songwriters Many of those who remained interested in traditional folk music styles such as Celtic or Klezmer music tended to be very insular and conservative in their approach rather than linking their chosen genre to a wider world of folk music however more recent attempts at fusion or world music suggest a return to the eclectic spirit of the 1960s folk revival Thus from 1945 to 1980 folk music in Canada and America experienced an evolving and complex relationship with the concepts of nation and national identity Students will find the book useful as an introduction not only to key themes in the folk revival but also to concepts in the study of national identity and to topics in American and

Canadian cultural history Academic specialists will encounter an alternative perspective from the more general broad approach offered by earlier histories of the folk revival movement *Ethnoreligiosity in the Contemporary Societies of the Former Yugoslavia* Branko Sekulic, 2022-02-08 Using Christian communities in the former Yugoslavia as a case study Branko Sekulic introduces the concept of ethnoreligiosity to the theological discussion in order to resolve the confusion that occurs when scholars talk about the concepts of ethno religion or ethnoreligion Ethno religion ethnoreligion came to describe the phenomenon of ethnic religion as a certain cultural specificity and which by itself has no negative connotation but due to the lack of a better expression it has been used as a term for the phenomenon of ethnic and religious conflict and discrimination In that sense ethnoreligiosity can be defined as a phenomenon resulting from the usurpation of the religious aspect of human life by the ethnic one or more precisely it emerges as a consequence of an ethnic ethnonational ideological overtaking of the structures of the religious organization It takes place through the attempt to give sacral connotation to a particular ethnonational myth as an integral part of ethnonational ideology with the result that religious feeling is no longer generated on a religious but primarily on an ethnonational base By understanding the proper definition and manifestation of ethnoreligiosity one will have the opportunity to discern the basic components of this phenomenon not only within the countries of the former Yugoslavia but in other countries as well **American Military History** Daniel K. Blewett, 2008-12-30 In this companion volume to his 1995 bibliography of the same title Daniel Blewett continues his foray into the vast literature of military studies As did its predecessor it covers land air and naval forces primarily but not exclusively from a U S perspective with the welcome emergence of small wars from publishing obscurity In addition to identifying relevant organizations and associations Blewett has gathered together the very best in chronologies bibliographies biographical dictionaries indexes journals abstracts glossaries and encyclopedias each accompanied by a brief descriptive annotation This work remains a pertinent addition to the general reference collections of public and academic libraries as well as special libraries government documents collections military and intelligence agency libraries and historical societies and museums
