Interactive TV in the UK Barbara Katz, 2001-07-30 Inhaltsangabe Abstract Interactive Television iTV has been around for several decades Most people have probably heard the term before Having started in the USA with some trials it is now conquering the UK The first interactive services on Digital TV DTV have been broadcasted 18 months ago and are continuously growing in number The four platform providers Sky NTL ONdigital and Telewest are trying to make their interactive services as appealing as possible and are of course offering new advertising opportunities for advertisers on that new medium The aims of this project are to analyse those new advertising opportunities and compare them to advertising on traditional TV and the Internet and find out whether advertising on iTV combines their strengths and overcomes some of their weaknesses In order to achieve this the literature review focuses on the identification of the strengths and weaknesses of advertising on traditional TV and the Internet and also provides a good overview over the iTV market in the UK and the current developments The UK is leading the way in the development of iTV and is even supposed to be 12 to 18 months ahead of the USA The market is highly competitive and fragmented with the four different platform providers offering three different forms of receiving DTV of which satellite is leading in the numbers of subscribers The predictions of the DTV uptake are very positive and the spendings for advertising on iTV are supposed to be tremendous within the next couple of years The results of the interviews carried out with iTV experts from the platform providers media and advertising agencies show that advertising on iTV indeed combines the strengths and overcomes some weaknesses and has the potential to be more successful than its two closest relatives Due to the fact that it is still in its infancy and companies are just starting to test this new medium and no success stories have been published so far advertising on iTV in its current form is not yet the killer application it was supposed to be and the uptake of T commerce is quite questionnabel as well It also becomes clear though that iTV does have a great potential and when the technology is creatively used to make ads more involving and engaging it will be big Inhaltsverzeichnis Table of Contents 1 INTRODUCTION 6 2 SETTING THE SCENE LITERATURE REVIEW 8 2 1 TRADITIONAL TV ADVERTISING 8 2 1 1 Strengths of traditional TV **The Essential Guide to Computer Data Storage** Andrei Khurshudov, 2001 This book covers all data storage systems and latest technologies It s a practical easy to use book on data storage Extensive glossary of computer data storage related terms Aimed at a wide audience from beginner to advanced levels *The Essential Guide to Semiconductors* James L. Turley, 2003 The Essential Guide to Semiconductors is a complete guide to the business and technology of semiconductor design and manufacturing Conceptual enough for laypeople and nontechnical investors yet detailed enough for technical professionals Jim Turley explains exactly how silicon chips are designed and built illuminates key markets and opportunities and shows how the entire industry fits together **The Essential Guide to Home Networking Technologies** Gerard O'Driscoll, 2001 PLEASE PROVIDE COURSE INFORMATION PLEASE PROVIDE *Interactive TV Standards* Steven Morris, Anthony

Smith-Chaigneau,2012-08-06 For any digital TV developer or manager the maze of standards and specifications related to MHP and OCAP is daunting you have to patch together pieces from several standards to gather all the necessary knowledge you need to compete worldwide The standards themselves can be confusing and contain many inconsistencies and missing pieces Interactive TV Standards provides a guide for actually deploying these technologies for a broadcaster or product and application developer Understanding what the APIs do is essential for your job but understanding how the APIs work and how they relate to each other at a deeper level helps you do it better faster and easier Learn how to spot when something that looks like a good solution to a problem really isn't Understand how the many standards that make up MHP fit together and implement them effectively and quickly Two DVB insiders teach you which elements of the standards that are needed for digital TV highlight those elements that are not needed and explain the special requirements that MHP places on implementations of these standards Once you've mastered the basics you will learn how to develop products for US European and Asian markets saving time and money By detailing how a team can develop products for both the OCAP and MHP markets Interactive TV Standards teaches you how to leverage your experience with one of these standards into the skills and knowledge needed to work with the critical related standards Does the team developing a receiver have all the knowledge they need to succeed or have they missed important information in an apparently unrelated standard Does an application developer really know how to write a reliable piece of software that runs on any MHP or OCAP receiver Does the broadcaster understand the business and technical issues well enough to deploy MHP successfully or will their project fail Increase your chances of success the first time with Interactive TV Standards *Entertainment Computing - ICEC 2004*
