illustrations **Essentials of Biological Anthropology** Carl Trey, 2025-08-25 Biological anthropology is a subfield of anthropology that studies the biological and behavioral facets of human beings. It also involves the study of extinct hominin ancestors and non-human primates related to humans. Biological anthropology is subdivided into several branches such as primatology, human behavioral ecology, paleoanthropology, bioarchaeology, and human biology. These branches focus on applying evolutionary theory to understand human biology and behavior. This book is compiled in such a manner that it will provide in-depth knowledge about the theory and practice of biological anthropology. Its various sub-fields along with technological progress that have future implications are glanced at herein. This book will serve as a reference to a broad spectrum of readers.

Fundamentals of Biological Anthropology John Relethford, 1997 A brief introduction to contemporary biological/physical anthropology. This text presents balanced coverage of the major components of the field: evolutionary theory and genetics, the biology, behavior, and evolution of the living primates, human evolution, and human variation. This is a shortened version of *The Human Species: An Introduction to Biological Anthropology*, Third Edition.
