Laszlo, 2012-12-06 There are greatly divergent modes of thinking and widely differing problems subsumed as belonging to the domain of eontemporary philosophy Some philosophers may weil find that they have little more in eommon with their coileagues than their interest in exposing a problem on the level of thought systematically and with the optimum regard for the validity of their argumentation The traditional conflit between philosophie schools lies in the solution different thinkers

propose to a problem In our day however there is a deeper schism between the exponents of different schools than a difference in the problem's solution The conflict involves already the formulation of the problem There are at least two general modes of pursuing philosophical investigation where no conflict in the solution of problems not because there would be agreement among the thinkers is possible but because the problems attacked by the thought of one school are not taken into consideration by the adherents of the other In general it may be said without fear of serious opposition that the kind of problems dealt with by neo positivists and positivistic analysts are seldom if ever closely examined by ontologists metaphysicians existentialists and certain other schools of the speculative branch of philosophy while these philosophers deal with problems which are generally regarded to be outside the scope of philosophic inquiry by positivists and analysts
