The Building of Hong Kong Anthony Walker, Stephen M. Rowlinson, 1990-11-01 Hong Kong is one of the most spectacular cities in the world It has been built in a very short time Its builders have achieved remarkable results but their contribution had not been documented The Hong Kong Construction Association decided to correct this omission and commissioned this book to mark its 70th Anniversary Consequently the book concentrates on construction rather than design and highlights the main events in the evolution of the industry and its buildings up to the present day Therefore whilst reviewing historic projects and their builders it also covers the modern era from 1970-90 The major landmarks of Hong Kong's skyline are included but the less spectacular yet equally essential projects which contribute to Hong Kong's social fabric are not neglected The aim is to give flavor and feeling to the industry's contribution to this remarkable city state

Designing Emerging Markets Giaime Botti, 2023-05-22 This book offers a unique glance into the process of globalisation of the architectural practice during the last three decades through the lenses of innovative methodologies in architectural history based on quantitative data. Focusing on the golden age of globalisation 1990-2019 it investigates the transnational work of more than one thousand architectural firms of different business models from Europe, North America and the Asia Pacific in a broad sample of emerging markets: Mainland China, South East Asia, India, the Persian Gulf, Sub Saharan Africa, Russia and Kazakhstan and Latin America. In the book different thematic geographies are presented to explore the global scope of the contemporary profession, examine significant projects and the structural conditions behind them and reveal the debates that such works generated. Understanding the global agency of design firms in emerging markets also becomes a way to study different market conditions, modes of production and architectural trends comparatively and to highlight the shifts that occurred in the profession over the last few decades. The use of quantitative methodologies produces a novel and updated narrative on contemporary architecture in emerging markets grounded in quantitative data rather than in preassumptions and purely qualitative interpretations. Richly illustrated this book is further enhanced by an ample set of maps, graphs and tables to visualise data better. **Millard's Review of the Far East**, 1925 Vol 34 includes Special tariff conference issue Nov 6 1925. *Building Cycles* Richard Barras, 2009-08-13 The global economic crisis of 2008 was precipitated by a housing market crash thus highlighting the destabilizing influence of the property cycle upon the wider economy. This timely book by a world authority explores why cycles occur and how they affect the behaviour of real estate markets. The central argument put forward is that growth and instability are inextricably linked and that building investment acts both as a key driver of growth and as the source of the most volatile cyclical fluctuations in an economy. The role of building cycles in both economic growth and urban development is explored through a theoretical review and a comparative historical analysis of UK and US national data stretching back to the start of the nineteenth century together with a case study of the development of London since the start of the eighteenth century. A simulation model of the building cycle is presented and tested using data for the City of London office market. The analysis is then broadened to examine the operation of property cycles in global investment markets during the post war period focussing on their contribution to the diffusion of innovation, the accumulation of wealth and the propagation of market instability. *Building Cycles* growth instability concludes by synthesizing the main themes into a theoretical framework which can guide our understanding of the operation and impact of building cycles on the modern economy. Postgraduate students on courses in property and in urban development as well as professional property

researchers urban economists and planners will find this a stimulating read demanding but accessible
