Small Cinemas in Global Markets addresses aspects such as identity revisiting the past internationalized genres new forms of experimental cinema markets and production as well as technological developments of alternative small screens that open new perspectives into small cinema possibilities Small and big markets for small industries reveal an unimagined diversification of the cultural product and consequently the need to analyze the impact at local regional and global levels Much needed to continue and expand the existing scholarship in the field this volume is based on research by authors who approach their subject from Western theoretical perspectives with a professional mostly native knowledge of the language cultural realities and film industry practices It covers aspects from fifteen different countries including Bolivia Brazil China Hong Kong Croatia East Africa Kenya Tanzania and Uganda Greece Indonesia Lithuania Bulgaria Poland Romania Morocco and the United States Since both film and documentary distribution from certain areas of the globe on international markets remains problematic it is important for the academic field to discuss and circulate them as much as possible and to create the basis for further exploration Documenting and reflecting on the role state and reception of the film industry provides scholarly understanding to the industry's wide range of seemingly chaotic technological transformations
