Committee on Resources of American Libraries. National Union Catalog Subcommittee, 1968 **The Athenaeum** ,1905 The Encyclopedia Britannica: Latest Edition: A Dictionary of Arts, Sciences and General Literature ,1899 Athenaeum and Literary Chronicle ,1850 The Encyclopædia Britannica Hugh Chisholm, James Louis Garvin, 1926 Spinoza In English, A Bibliography Wayne Boucher, 1999-06-15 Spinoza in English i is the first bibliography to document the entire 300 year record of books monographs dissertations and articles in English on Benedict Spinoza as well as all translations of his works into English Arranged alphabetically by author or editor and internally cross referenced in the case of anthologies and replies this bibliography cites its own sources where appropriate and in many cases provides details on how to obtain out of print titles and unpublished dissertations Additionally it restores or corrects a good deal of earlier bibliographic detail and beginning with titles from the mid 1800s presents the citations in a uniform style This second edition adds hundreds of citations including dozens of titles hitherto overlooked thus bringing the total to nearly 2700 on the main level with hundreds of secondary references to later editions and reprints It also provides an index and occasionally an abstract when the author s title inadequately describes the contents As the only source of its kind this bibliography is an indispensable reference tool for research libraries and individual scholars concerned with the life and works of Spinoza Wayne Boucher s introduction is augmented by a preface by Professor Manfred Walther the most complete bibliography of works in English on Spinoza enlarged corrected and improved from first edition with numbered entries uniquely comprehensive current and authoritative numbered entries and subject title index for easy reference Samuel Taylor, Angler and Stenographer ... Alexander Tremain Wright, 1905 **The Coming of Materials Science** R.W. Cahn, 2001-03-16 The Coming of Materials Science both covers the discipline of materials science and draws an impressionistic map of the present state of the subject The first chapter examines the emergence of the materials science concept in both academe and industry The second and third chapters delve back into the prehistory of materials science examining the growth of such concepts as atoms crystals and thermodynamics and also examine the evolution of a number of neighbouring disciplines to see what helpful parallels might emerge The book contains numerous literature references Many refer to the earliest key papers and books while others are to sources often books offering a view of the present state of a topic Early references are to the past but as the book continues it brings the reader up to date with more recent sources The

author Professor Robert Cahn FRS has striven to be critical about the history of the discipline of materials science and to draw general conclusions about scientific practice from what he has discovered about the evolution of materials science Further issues that the book highlights include What is a scientific discipline How do disciplines merge and differentiate Can a discipline also be interdisciplinary Is materials science a real discipline A large range of themes is presented in the book and readers are invited to interact with the author if they reach alternative conclusions This book is not just for reading and reference but exists to stimulate thought and provoke discussion as well **Saturday Review of Literature** ,1926
