Runaway Anthony Chaney, 2017-08-09
The anthropologist Gregory Bateson has been called a lost giant of twentieth century thought In the years following World War II Bateson was among the group of mathematicians engineers and social scientists who laid the theoretical foundations of the information age In Palo Alto in 1956 he introduced the double bind theory of schizophrenia By the sixties he was in Hawaii studying dolphin communication Bateson's discipline hopping made established experts wary but he found an audience open to his ideas in a generation of rebellious youth To a gathering of counterculturalists and revolutionaries in 1967 London Bateson was the first to warn of a greenhouse effect that could lead to runaway climate change Blending intellectual biography with an ambitious reappraisal of the 1960s Anthony Chaney uses Bateson's life and work to explore the idea that a postmodern ecological consciousness is the true legacy of the decade Surrounded by voices calling for liberation of all kinds Bateson spoke of limitation and dependence But he also offered an affirming new picture of human beings and their place in the world as ecologies knit together in a fabric of meaning that said Bateson we might as well call Mind
American Bards Edward Whitley, 2010-10-11
Walt Whitman has long been regarded as the quintessential American bard the poet who best represents all that is distinctive about life in the United States Whitman himself encouraged this view but he was also quick

to remind his readers that he was an unlikely candidate for the office of national poet and that his working class upbringing and radical take on human sexuality often put him at odds with American culture While American literary history has tended to credit Whitman with having invented the persona of the national outsider as the national bard Edward Whitley recovers three of Whitman's contemporaries who adopted similar personae James M Whitfield an African American separatist and abolitionist Eliza R Snow a Mormon pioneer and women's leader and John Rollin Ridge a Cherokee journalist and Native rights advocate These three poets not only provide a counterpoint to the Whitmanian persona of the outsider bard but they also reframe the criteria by which generations of scholars have characterized Whitman as America's poet This effort to resituate Whitman's place in American literary history provides an innovative perspective on the most familiar poet of the United States and the culture from which he emerged

Transgression and Redemption in American Fiction Thomas J. Ferraro, 2020-12-03 Transgression and Redemption in American Fiction is a critical study of classic American novels Ferraro returns to Hawthorne's closet of secreted sin to reveal *The Scarlet Letter* as a deviously psychological turn on the ancient Mediterranean Catholic folk tales of female wanderlust cuckolding priests and demonic revenge This lights the way to explore what Ferraro calls the Protestant temptation to Marian Catholicism in seven modern American masterworks including Chopin's *The Awakening* Fitzgerald's *The Great Gatsby* Cather's *The Professor's House* and Hemingway's *The Sun Also Rises* Transgression and Redemption in American Fiction explores stories of forbidden passion and sacrificial violence with ultra radiant women and sometimes men at their focus It examines how these novels speak to readers across religious and social spectrums generating an inclusive mode of address and near universal relevance Ferraro breaks the codes of contemporary criticism in his thematic focus and critical style going beyond Protestantism and even Judeo Christian Orthodoxy itself Transgression and Redemption in American Fiction encourages the attentive reader to think about the American imagination the myriad arts of writing about the passion plays of love and even our canonical structures for reading and thinking about literature in new ways

[History of Psychiatry and Medical Psychology](#) Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book's chapters e.g. Moras Marx's D B Weiner's examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease **The Reference Librarian's Bible** Steven

explores how textbook narratives about the Fascist Nazi past in Italy East Germany and West Germany followed relatively calm undisturbed paths of little change until isolated flashpoints catalyzed the educational infrastructure into periods of rapid transformation Though these flashpoints varied among Italy and the Germanys they all roughly conformed to a chronological scheme and permanently changed how each dark past was represented Historians have often neglected textbooks as sources in their engagement with the reconstruction of postfascist states and the development of postwar memory culture But as Teaching a Dark Chapter demonstrates textbooks yield new insights and suggest a new chronology of the changes in postwar memory culture that other sources overlook Employing a methodological and temporal rethinking of

the narratives surrounding the development of European Holocaust memory Daniela R P Weiner reveals how long before 1968 textbooks in these three countries served as important tools to influence public memory about Nazi Fascist atrocities As Fascism had been spread through education then education must play a key role in undoing the damage Thus to repair and shape postwar societies textbooks became an avenue to inculcate youths with desirable democratic and socialist values Teaching a Dark Chapter weds the historical study of public memory with the educational study of textbooks to ask how and why the textbooks were created what they said and how they affected the society around them **Corporate**
