Archeology of Tourism in Yellowstone National Park Annalies Corbin, Matthew Russell, 2009-12-01. Far too often in the field of archeology the wheel of understanding and insight has a narrow focus that fails to recognize critical studies. Crucial information regarding pivotal archeological investigations at a variety of sites worldwide is extremely difficult if not impossible to obtain. The majority of archeological analysis and reporting at best has limited publication. The majority of archeological reports are rarely seen and when published are often only in obscure or out of print journals the reports are almost as hard to find as the archeological sites themselves. There is a desperate need to pull seminal archeological writings together into single issue or thematic volumes. It is the intention of this series *When the Land Meets the Sea* to address this problem as it relates to archeological work that encompasses both terrestrial and underwater archeology on a single site or on a collection of related sites. For example despite the fact that we know that bays and waterways structured historic settlement there is a lack of archeological literature that looks at both the nautical and terrestrial signatures of watersheds in influence on historic culture. *The Ancient Sailing Season* James Beresford, 2012-11-21. Providing a comprehensive examination of the capacity of ancient ships and seafarers to cope with seasonally changing sea conditions this book draws on a wide range of ancient literary sources while also taking account of modern weather records hydrological data and recent archaeological discoveries. Taking a fresh look at the various ways in which seasonality affected maritime transport across the sea lanes of the ancient world this book offers new perspectives on the nature of seaborne trade naval warfare and piratical operations. The result is a volume that questions many long held scholarly assumptions concerning the strength and seaworthiness of ancient vessels as well as the abilities of Greek and Roman mariners to regularly undertake voyages across hazardous stretches of sea.
