This book assembles the latest knowledge linked to urban environments and urban socio eco technological systems including urban energy transport material and ecosystems Urban environments and systems affect every person's life in many ways and can have negative impacts on the local and global environment They create value but sometimes with a high environmental cost from a lifecycle perspective Therefore scientists and global leaders call for an urban transition to create more urban environments and systems that are climate positive sustainable and healthy which is necessary for society to function within the planetary boundaries This is a great challenge Huge transformations and new ways of thinking regarding the design and co existence of technical social and ecological systems are necessary to turn the present challenge into opportunities This book Urban Transition Perspectives on Urban Systems and Environments explores this challenge and several different topics related to possible probable or necessary urban transitions in the urban environment It assembles a variety of authors who present many aspects and the latest knowledge linked to urban transitions of the urban environment

and urban socio eco technological systems including urban energy transport building material and eco systems Furthermore the importance of urban systems and urban environments is seldom clearly linked to their impact on the environment and humans This book examines this gap the crucial issues relating to how urban systems influence the urban structure and how they can be formed and designed to become more sustainable It explores the link between the complex systems in cities the physicality of the built environment and the living environments for the people The book proposes a rich garden of ideas to provoke and develop current research debate and new forms of practice Ways to the West Tim Sullivan,2015-08-09 In Ways to the West Tim Sullivan embarks on a car less road trip through the Intermountain West exploring how the region is taking on what may be its greatest challenge sustainable transportation Combining personal travel narrative historical research and his professional expertise in urban planning Sullivan takes a critical yet optimistic and often humorous look at how contemporary Western cities are making themselves more hospitable to a life less centered on the personal vehicle The modern West was built by the automobile but so much driving has jeopardized the West s mystic hold on the American future At first automobility heightened the things that made the West great but love became dependence and dependence became addiction Via his travels by bicycle bus and train through Las Vegas Phoenix Denver Boise Salt Lake City and Portland Sullivan captures the modern transportation evolution taking place across the region and the resulting ways in which contemporary Western communities are reinterpreting classic American values like mobility opportunity adventure and freedom Finding a West created lost and reclaimed Ways to the West will be of great interest to anyone curious about sustainable transportation and the history geography and culture of the American West **Sustainable Parking**

Management Nada Milosavljevic,Jelena Simicevic,2019-05-09 Sustainable Parking Management provides the latest research findings in the field encouraging transport planners and policymakers to use parking policy as a tool for managing parking and transport systems The book teaches up to date parking management techniques for selecting parking policies and understanding parking behavior when faced with policy interventions It shows when to apply each policy how to include user attitudes in policy definition and how to model user behavior when refining parking policies In addition it stresses the need to reduce overall city driving and the need to allow users to choose the transport mode that best suits their needs As the growth of cities and car dependency worldwide has led to parking problems resulting in increased traffic congestion pollution and overall urban chaos this book creates a model to help deal with the fallout **Transport and Mobility Futures in Urban**

Africa Ransford A. Acheampong,Karen Lucas,Michael Poku-Boansi,Chinebuli Uzundu,2022-11-02 This book provides a collection of insightful conceptual and empirical works that situate transport and mobility challenges in the unique context of individual countries and cities while highlighting commonalities across the African continent Written from an interdisciplinary perspective the book covers important themes in transport and mobility including the links between urbanization urban structure and accessibility transport equity and poverty non motorized transport public transport and the

challenges and opportunities of new and emerging transport technologies and ICT mediated mobility solutions Each chapter engages with the normative imperatives that are critical to improving the transport and mobility situations of African urban areas now and in the future
