Gustav Stresemann 1878-1978:

Gustav Stresemann Karl Heinrich Pohl, 2019-05-14 As a foreign minister and chancellor of Weimar Germany Gustav Stresemann is a familiar figure for students of German history one who for many embodied the best qualities of German interwar liberalism However a more nuanced and ambivalent picture emerges in this award winning biography which draws on extensive research and new archival material to enrich our understanding of Stresemann's public image and political career It memorably explores the personality of a brilliant but flawed politician who endured class anxiety and social marginalization and who died on the eve of Germany's descent into economic and political upheaval World Market Transformation Robrecht Declercq, 2017-05-25 To the surprise of many regionally embedded clusters of small to medium sized businesses have continued to exist in spite of industrialisation and mass production While scholars have discovered that the advantages of embeddedness in terms of industrialisation were situated in interfirm cooperation and conflict resolving mechanisms it is far less clear how changing historical circumstances on the world market i.e. globalisation affected such systems Taking a look inside Leipzig a capital of the global fur industry between 1870 and 1939 with its numerous highly specialised businesses both in production as well as trade World Market Transformation examines the robustness of district firms within the highly volatile international fur business This book examines how firm embeddedness not only served to overcome challenges related to industrialisation but also strengthened the abilities of cluster firms to deal with changing world market circumstances World Market Transformation integrates the interior biased research tradition on local business systems and industrial districts into the exterior fields of global and transnational history It is demonstrated that the local business district not only emerged because of the expansion of international trade but that district processes of interfirm cooperation also gave shape to the spatial distribution conventions and structures of the very same world market The analysis of embedded communities thus offers an important instrument to examine phenomena of economic globalisation but also how such macro economic developments have been shaped and actively constructed by local actors *Gustav Stresemann* Gustav Stresemann, Felix Hirsch, 1978 Gustav Stresemann Felix Edward Hirsch, 1978 **Clarence Dillon** Robert C.
