Rethinking Roma Ian Law, Martin Kovats, 2018-02-06 This book provides the first comprehensive analysis of the emergence development and implications of the Roma political phenomenon in contemporary Europe It also

challenges the conventional epistemological basis to political claims of distinct Roma people and argues that the contemporary politics of Roma is better understood as the public application of Roma identity In recent times a new word has entered the political lexicon across Europe and beyond Roma Thirty years ago it would have been hard to encounter the public use of the word outside of a small number of academics and activists In the second decade of the new millennium Roma has become a dynamic political identity championed by hundreds of organisations thousands of activists and applied to millions of people across Europe and beyond Roma has become an agenda item for local and national authorities as well as being taken up by the European Union and other international organisations In challenging the conventional epistemology this book examines the principal interests and processes that are constructing Roma as a public political identity encompassing highly differentiated groups of people This book brings together critical race theory and theories of ethnic mobilisation to provide a new critical framework for understanding Roma identity history and transnational politics It will be of particular interest to students and academics within the fields of global racialization and ethnicity studies
