## **H W Schneider Of Barrow Bowness:**

**H.W. Schneider of Barrow and Bowness** Arthur Geoffrey Banks,1984      **Barrow Steelworks** Stanley Henderson,K E Royall,2015-08-03 During the second half of the nineteenth century Barrow in Furness became a pioneer in iron and steel production It went on to grow astronomically owning collieries in three counties and ore mines in two and became the largest integrated steelworks in north Lancashire and Cumberland and at one time the largest steelworks in the world Its success was due in part to having the prestige of three dukes as directors as well as to being only 2 miles away from one of the largest and richest iron ore mines in the country Written by two former employees of the works Barrow Steelworks chronicles the company s past from the early empire through the inter war and post war years the development of continuous casting in the 1950s which revolutionised steelmaking and finally the struggles and ultimate demise from the 1960s onwards of this once prominent industry      *The Making of a Cultural Landscape* Jason Wood,John K. Walton,2016-03-09 For centuries the English Lake District has been renowned as an important cultural sacred and literary landscape It is therefore surprising that there has so far been no in depth critical examination of the Lake District from a tourism and heritage perspective Bringing together leading writers from a wide range of disciplines this book explores the tourism history and heritage of the Lake District and its construction as a cultural landscape from the mid eighteenth century to the present day It critically analyses the relationships between history heritage landscape culture and policy that underlie the activities of the National Park Cumbria Tourism and the proposals to recognise the Lake District as a UNESCO World Heritage Site It examines all aspects of the Lake District s history and identity brings the story up to date and looks at current issues in conservation policy and tourism marketing In doing so it not only provides a unique and valuable analysis of this region but offers insights into the history of cultural and heritage tourism in Britain and beyond      *The Lake Counties from 1830 to the Mid-twentieth Century* John Duncan Marshall,John K. Walton,1981      **The Diary of William Fisher of Barrow, 1811 to 1859** William Fisher,1986      **Swansea Copper** Chris Evans,Louise Miskell,2020-10-27 The first book to detail the global impact of copper production in Swansea Wales and how a major technological shift transformed the British Isles into the world s most dynamic center of copper smelting Eighteenth century Swansea Wales was to copper what nineteenth century Manchester was to cotton or twentieth century Detroit to the automobile Beginning around 1700 Swansea became the place where a revolutionary new method of smelting copper later christened the Welsh Process flourished Using mineral coal as a source of energy Swansea s smelters were able to produce copper in volumes that were quite unthinkable in the old established smelting centers of central Europe and Scandinavia After some tentative first steps the Swansea district became a smelting center of European then global importance Between the 1770s and the 1840s the Swansea district routinely produced one third of the world s smelted copper sometimes more In Swansea Copper Chris Evans and Louise Miskell trace the history of copper making in Britain from the late seventeenth century when the Welsh Process transformed Britain s

copper industry to the 1890s when Swansea's reign as the dominant player in the world copper trade entered an absolute decline. Moving backward and forward in time, Evans and Miskell begin by examining the place of copper in baroque Europe, surveying the productive landscape into which Swansea Copper erupted and detailing the means by which it did so. They explain how Swansea copper achieved global dominance in the years between the Seven Years War and Waterloo, explore new commercial regulations that allowed the importation to Britain of copper ore from around the world and connect the rise of the copper trade to the rise of the transatlantic slave trade. They also examine the competing rise of the post-Civil War US copper industry. Whereas many contributions to global history focus on high-end consumer goods, Chinese ceramics, Indian cottons and the like, Swansea Copper examines a producer good, a metal that played a key role in supporting new technologies of the industrial age like steam power and electricity. Deftly showing how deeply mineral history is ingrained in the history of the modern world, Evans and Miskell present new research not just on Swansea itself but on the places its copper industry affected: mining towns in Cuba, Chile, southern Africa and South Australia. This insightful book will be of interest to anyone concerned with the historical roots of globalization and the Industrial Revolution as a global phenomenon.

**The Companion Guide to the Lake District** Frank Welsh, 1997. England's Lake District is thoroughly explored in this knowledgeable guide. Frank Welsh is the consummate guide and companion, writing with wit and intelligence and leaving hardly a stone unturned. He covers both the less-visited and, in his view, unappreciated parts of the Lake District as well as those which no visitor will want to miss. Back cover.

Money Pits: British Mining Companies in the Californian and Australian Gold Rushes of the 1850s John Woodland, 2016-04-15. Between 1849 and 1853, shares in nearly 120 public companies to exploit the booming goldfields of California and Australia were offered to the British public. The companies were collectively capitalised at over 15 million, but in the end only some 1.75 million was actually raised. Between 42 of them, with only one company surviving, what the newspapers of the day described as a gold bubble. This book provides an overview of the entire bubble event, its antecedents and its outcomes. A number of researchers have investigated an earlier boom in the mid-1820s to reopen gold and silver mines in Latin America and several have studied individual company operations of that period. This is the first detailed investigation of the British gold bubble companies of the 1850s and their involvement in the almost simultaneous gold rushes on both sides of the Pacific Ocean.
