## **Hairy Cell Leukaemia:**

**Hairy-Cell Leukaemia** J. C. Cawley, G. F. Burns, F. G. J. Hayhoe, 2012-12-06 Hairy cell leukaemia HCL is an established clinicopathological entity typified by a chronic picture of substantial splenomegaly less frequent hepatomegaly and only inconspicuous lymphadenopathy Central to the diagnosis is the pathognomonic hairy cell HC a distinctive mononuclear cell that circulates in varying numbers and infiltrates a variety of organs including the bone marrow and spleen Peripheral pancytopenia is often present and circulating HCs may be infrequent HCs are invariably present in the bone marrow but perhaps because of the extensive fibrosis characteristic of the disease the marrow is frequently difficult to aspirate and confirmation of the diagnosis may require histopathological examination of biopsy material The incidence of the disease has been given as 2% of leukaemias 29/319 or as approximately 1 % of identifiable lymphomas 23/30 Our own experience of collecting cases in the United Kingdom leads us to expect that at any given time one patient with HCL will be attending a clinic serving some 150 000 people

**Hairy Cell and Chronic Lymphocytic Leukemia** Andrew T. Huang, 1987 Written by international specialists this volume describes recent advances in the study of chronic lymphocytic and hairy cell leukemia Hairy Cell and Chronic Lymphocytic Leukemia Thirty Years of Progress is based on the proceedings of the recent Rundles Symposium on Hairy Cell Leukemia and Chronic Lymphocytic Leukemia held at Searle Center of the Duke University Medical Center in Durham North Carolina Included in this volume are the latest developments in the study of chronic lymphocytic leukemia such as new information regarding its cellular origin the immunologic aberrations caused by these abnormal lymphocytes and the clinical manifestations of this disorder This book also features progress in the study of hairy cell leukemia Contributors to this volume describe the immunologic means of study and the use of gene probes for cells of B lineage that have led to today's clearer definition of the pathognomonic hairy cells Also discussed is the recent and successful use of alpha interferon or 2 deoxycoformycin in the treatment of hairy cell leukemia

**Hairy-cell Leukaemia** John Burthorn, John C. Cawley, 2011-10-21 Hairy cell Leukaemia HCL has always attracted an interest out of all proportion to its frequency and continues to do so There are two reasons for this The first is that the disease is unusually responsive to therapy and second is that it has provided a number of important insights into B cell biology This monograph is a comprehensive account of hairy cell leukaemia and aims to provide a more detailed account than is available in the existing literature The work is timely because a consensus has now emerged concerning accurate differential diagnosis and curative treatment These aspects therefore form the focus of the book and are considered in detail The basic advances in the laboratory that encourage the belief that elucidation of the underlying oncogenic event in the disease may be within reach The background to this belief is extensively renewed As a result the monograph will be of interest and practical value to both clinicians and researchers in this and related fields
