## **Justifying Language:**

Justifying Language Kevin Mills, 1996-01-12 Taking three terms from the letters of Paul as a thematic guide Kevin Mills investigates the respective roles of faith hope and love in language and interpretation and uses them to uncover and to question some of the key assumptions in deconstructive and postmodernist discourse Its critical approach to interpretation theory from Origen onwards challenges the reader to reassess Pauline categories such as letter and spirit and to re think the possibility of Christian engagement with contemporary literary theory

**The Politics of Justifying Force** Charlotte Peevers, 2013-11-07 What are the politics involved in a government justifying its use of military force abroad What is the role of international law in that discourse How and why is international law crucial to this process And what role does the media have in mediating the interaction of international law and politics This book provides a fresh and engaging answer to these questions It introduces different actors to the study of international law in this context in particular highlighting the importance of institutional actors and the role of the media It takes a theoretical approach informed by detailed empirical analysis of key case studies which challenges the traditional distinction between the spheres of the international and the domestic in global affairs and the role of international law in the making of public policy The book specifically critiques the idea of the politics of justification which argues that deploying international legal norms to justify governmental decisions resulting in the use of force necessarily constrains government actions and leads to fewer instances of military intervention The politics of justification on this account can be seen as a progressive practice through which international law can become embedded in domestic societies The book investigates the actors engaged in this justification and the institutional contexts within which legal justification is articulated interpreted and contested It provides a rich detailed account of domestic British discourse in the crucial case studies of the Suez Crisis of 1956 and the Iraq War of 2003 making extensive use of archival material newspaper and television reporting Parliamentary debates polling data personal memoirs and the declassified material provided to several Public Inquiries including the Chilcot Inquiry In light of these sources it considers the concept of international law as a language and form of communication rather than a set of abstract norms It argues that a detailed understanding of how that language is deployed both in private and in public is essential to gaining a deeper understanding of the role of international law in domestic politics This book will be illuminating reading for scholars and students the use of force in international law historians and media theorists

Justifying Historical Descriptions C. Behan McCullagh, 1984-10-25 In common with history all the social sciences crucially rely on descriptions of the past for their evidence But when if ever is it reasonable to regard such descriptions as true This book attempts to establish the conditions that warrant belief in historical descriptions It does so in a non technical way analysing numerous illustrations of the different kinds of argument about the past employed by historians and others The author concludes that no historical description can be finally proved and that we are only ever justified in believing them for certain practical purposes This

central question has not been addressed in such a thorough and systematic manner before It draws on recent philosophy of history and will interest philosophers But the wealth of material and accessibility of the presentation will also make it very valuable for historians and other social scientists concerned with the logic of their disciplines **Advances in**

**Interdisciplinary Language Policy** François Grin, László Marác, Nike K. Pokorn, 2022-01-15 This book stems from the joint effort of 25 research teams across Europe representing a dozen disciplines from the social sciences and humanities resulting in a radically novel perspective to the challenges of multilingualism in Europe The various concepts and tools brought to bear on multilingualism are analytically combined in an integrative framework starting from a core insight in its approach to multilingualism Europe is pursuing two equally worthy but non converging goals namely the mobility of citizens across national boundaries and hence across languages and cultures and the preservation of Europe's diversity which presupposes that each locale nurtures its linguistic and cultural uniqueness and has the means to include newcomers in its specific linguistic and cultural environment In this book scholars from applied linguistics economics the education sciences finance geography history law political science philosophy psychology sociology and translation studies apply their specific approaches to this common challenge Without compromising the state of the art analysis proposed in each chapter particular attention is devoted to ensuring the cross disciplinary accessibility of concepts and methods making this book the most deeply interdisciplinary volume on language policy and planning published to date **Justifying violence** Naomi

Head, 2017-10-03 When is the use of force for humanitarian purposes legitimate The book examines this question through one of the most controversial examples of humanitarian intervention in the post Cold War period the 1999 NATO intervention in Kosovo Justifying Violence applies a critical theoretical approach to an interrogation of the communicative practices which underpin claims to legitimacy for the use of force by actors in international politics Drawing on the theory of communicative ethics the book develops an innovative conceptual framework which contributes a critical communicative dimension to the question of legitimacy that extends beyond the moral and legal approaches so often applied to the intervention in Kosovo The empirical application of communicative ethics offers a provocative and nuanced account which contests conventional interpretations of the legitimacy of NATO's intervention **Asset-Based Language and Literacy** Tonya Ward

*The Evaluation of Language Regimes* Michele Gazzola, 2014-08-15 Building on existing analytical frameworks this book provides a new methodology allowing different language policies in international multilingual organisations or language regimes to be compared and evaluated on the basis of criteria such as efficiency and fairness It explains step by step how to organise the evaluation of language regimes and how to design and interpret indicators for such evaluation The second part of this book applies the theoretical framework to the evaluation of the language policy of the Patent Cooperation Treaty PCT division of the World Intellectual Property Organisation WIPO and the European Patent Office EPO Results show that an increase in linguistic diversity of the language regimes of patent organisations can both improve the efficiency of the patent system and lead to a more balanced distribution of costs among countries This book is a resource for scholars in language policy and planning and for policy makers in the international and European patent system

Newman and Justification T. L. Holtzen, 2024 *Newman and Justification* examines John Henry Newman's via media doctrine of the justifying presence in his *Lectures on Justification* T. L. Holtzen contends that Newman put forth his via media doctrine of the justifying presence by employing a trinitarian grammar of divine inhabitation in which the Holy Spirit is the formal cause of justification as a solution to the Reformation debate over justification Newman sets his via media of justification between the extremes of justification by mere imputation in popular Protestantism and that of justification by works righteousness in English Arminianism and Romanism The word justification means both being declared and being made righteous because the eternal Word is spoken into the soul by the Holy Spirit in justification Newman identifies this with the gift of righteousness Romans 5:17 and calls it the doctrine of the

justifying presence The justifying presence is an imparted righteousness in distinction from both the Protestant notion of imputed and Roman Catholic idea of inherent righteousness The justifying presence comes through the sacraments creates faith in the human soul and begins a renewal in good works all of which in different ways justify The divine inhabitation of the Holy Spirit in the soul is the formal cause of justification by causing a duplex iustitia of both Christ's imputed righteousness and by beginning an actual righteousness in renewal Newman's via media doctrine of the justifying presence has great ecumenical promise because it shows how the trinitarian grammar of justification necessarily causes renewal through divine inhabitation

**Translation and Public Policy** Gabriel González Núñez, Reine Meylaerts, 2017-04-21 This book brings together an ensemble of leading voices from the fields of economics language policy law political philosophy and translation studies They come together to provide theoretical perspectives and practical case studies regarding a shared concern translation policy Their timely perspectives and case studies allow for the problematizing and exploration of translation policy an area that is beginning to come to the attention of scholars This book offers the first truly interdisciplinary approach to an area of study that is still in its infancy It thus makes a timely and necessary contribution As the 21st century marches on authorities are more and more confronted with the reality of multilingual societies and the monolingual state policies of yesteryear seem unable to satisfy increasing demands for more just societies Precisely because of that language policies of necessity must include choices about the use or non use of translation at different levels Thus

translation policy plays a prominent yet often unseen role in multilingual societies This role is shaped by tensions and compromises that bear on the distribution of resources choices about language legal imperatives and notions of justice This book aims to inform scholars and policy makers alike regarding these issues Translating in Linguistically Diverse Societies Gabriel González Núñez,2016-09-09 This work is the first book length treatment on translation policy Nearly everywhere in the world populations are multilingual and mobile consequently language policies developed by the authorities must include choices about the use or non use of translation This book recognizes that these choices or the absence thereof become policies of their own in terms of translation It builds upon the work of scholars in the fields of translation studies and language planning and policy in order to develop a new theoretical perspective on translation policy In essence the book proposes that translation policy can be understood as the management practice and beliefs surrounding the use of translation The book deals with these issues under European and international law and then explores such management practice and beliefs in the UK as a case study Ultimately the reader can find a fuller appreciation of both the importance and complexity of translation policy **Justification: What's at Stake in the Current Debates** Mark Husbands,Daniel J.
