How Karl Blossfeldt's plant photographs were disseminated in the popular media of the time from pattern books to magazine spreads. In the 1890s the Berlin artist sculptor and teacher Karl Blossfeldt 1865-1932 started to photograph plants, seeds and other illustrative material from nature for the purpose of teaching his students about the patterns and designs found in natural forms. His close-ups of the smallest plant parts magnified up to 30 times their natural size startle us as they dramatically highlight the geometrical and sculptural properties of plants. Published in 1928, his first collection of photographs *Urformen der Kunst* later translated into English as *Art Forms in Nature* became an international bestseller and remains one of the most significant photobooks of the 20th century. Karl Blossfeldt *Variations* is the first monograph to examine the reception of Blossfeldt's work. Drawing on unpublished materials, it analyzes the photographs' replication in teaching materials, pattern books, art books and in the pages of the illustrated press. The six sections of the book trace the paths that Blossfeldt's legendary plant motifs took in their incarnations as specimens, illustrations, patterns, analogues, models and abstractions from 1890 to 1945. Thematic contemporary appraisals illustrating the rediscovery of Blossfeldt's motifs in design and architecture over the past 20 years complement this new perspective on the beloved German photographer.

**KARL BLOSSFELDT. Photographs 1865-1932, Edition anglaise, allemande et française** Karl Blossfeldt, Rolf Sachsse, 1996. Karl Blossfeldt 1865-1932 photographed thousands of plants, always from the side and against a neutral background. This book features many of his photographs. *Karl Blossfeldt 1865-1932* Hans Christian Adam, 2014. Karl Blossfeldt's monochrome photographs present semi-abstract studies of diverse flora bridging the 19th and 20th century worlds of image making and bringing a distinctly sculptural aspect to a two-dimensional medium.

Karl Blossfeldt Ann Wilde, Jürgen Wilde, 2001-02-02. Newly discovered photographic collages by early twentieth-century photographer Karl Blossfeldt. Karl Blossfeldt 1865-1932 achieved overnight fame in the late 1920s with the first publication of his photographs of plants. Those photographs, which revealed the inner structures of the organic forms, immediately made him a pioneer of New Objectivity, an innovative movement in art and photography of the 1920s and 1930s. Blossfeldt, however, was neither a trained photographer nor a botanist. He was a sculptor and art professor who did his photographic work to generate teaching material for his students. The publication of this book is the result of an extraordinary event: the 1997 discovery in Blossfeldt's estate of sixty-one previously unknown collages in virtually mint condition of photographic contact prints arranged on large cardboard sheets. Blossfeldt apparently used these to study the relation and similarity of the photographs and to compare them graphically and aesthetically. On some Blossfeldt had made marks or handwritten notations. Others show lines for cropping. The collages published here for the first time unveil a hidden treasure of modern photography and cast fresh light on the systematic approach Blossfeldt used in his photographic

Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century. It sets out to be the standard definitive reference work on the subject for years to come. Its coverage is global, an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates, and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool, creative medium, and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics, students, researchers, and libraries worldwide.

Reframing Photography Rebekah Modrak, Bill Anthes, 2011. In an accessible yet complex way, Rebekah Modrak and Bill Anthes explore photographic theory, history, and technique to bring photographic education up to date with contemporary photographic practice.

**New Objectivity** Sergiusz Michalski, 2003. Drawing on new research from local archives as well as reinterpretations of published literature, *Power and the People* describes how England remained governable between 1525 and 1640 despite the wars, famine, epidemics, and dynastic and religious crises of the period. The book surveys the mechanisms of authority at various levels from the street and alehouse to the manor and the royal court. Maintaining order was a difficult challenge given that England had no standing army or professional police, and Alison Wall investigates everything from the roles of village constables to the social cohesiveness that came from civic celebrations and participatory politics. Her book provides students with a rich perspective on the social world and political culture of early modern England.

**No Two Alike** Ulrike Meyer Stump, 2018. *No Two Alike* documents an exhibition curated by Ulrike Meyer Stump as part of Cincinnati's 2018 FotoFocus Biennial with its general theme, Open Archive. The exhibition restages the historic encounter between Karl Blossfeldt's plant photographs and Francis Bruguière's light designs held at the Warren Gallery in London in 1929 and juxtaposes it with the Photograms and Negatives series by contemporary artist Thomas Ruff. The combination of Blossfeldt's biomorphism and Bruguière's abstraction offers clues for the understanding of British modernism and offers insight into the role photography and photobooks played in the British avant-garde. Throughout his career, Thomas Ruff has expressed great interest in the history of photography and has repeatedly shown a special affinity with Blossfeldt, particularly in his Negatives series. Bruguière's abstract light compositions, on the other hand, have strong formal ties to Ruff's photograms. *No Two Alike* expresses the three artists' mutual interest in the variant as a creative principle, also advancing the idea that each of these bodies of work presents a variant of the other.
