Fatal Episodes:

Suicide as a Dramatic Performance David Lester, 2017-07-05 Each suicide is as unique as the individuals involved especially if one examines the nature of the act and to what extent these acts can be viewed as a theatrical performance Focusing on the dramatic aspects of suicide may seem tangential to the physical and mental pain experienced by those who try to kill themselves but dramatic aspects often provide important clues for understanding the mental state of suicidal individuals David Lester and Steven Stack investigate what happens in the weeks days and hours before a suicide when the suicidal individual must make decisions and formulate the script for his or her suicidal act The editors argue that these choices may help us understand and prevent other suicides and stimulate new and innovative research in this important area Through twenty five substantive chapters including both quantitative and qualitative analyses this book offers insights into suicide as a dramatic act with chapters on the intended audience the suicide note the location and method chosen and cultural scripts including suicide by cop sati seppuku and duels The contributors to this volume argue that psychological social and cultural factors influence these choices and that the decisions made by the individual are important for understanding the mental state of the person choosing to die by suicide Infections in Cancer Chemotherapy J. Klastersky, 2013-10-22 Infections in Cancer Chemotherapy is a collection of paper that details the advancement in the understanding of infections in chemotherapy The coverage of the text includes aggressive cancer treatment and its role in predisposing to infection diagnosis of infection in patients with cancer and non bacterial infections associated with neoplastic disease The selection also tackles the protocol for an international prospective trial of initial therapy regimens in neutropenic patients with malignant disease and the use of gnotobiotics in hematology in improving acute leukemia treatment The book will be of great interest to oncologists and hematologists *Crime in Scotland 1660-1960* Anne-Marie Kilday, 2018-09-20 Scotland has often been regarded throughout history as the violent north but how true is this statement Does Scotland deserve to be defined thus and upon what foundations is this definition based This book examines the history of crime in Scotland questioning the labelling of Scotland as home to a violent culture and examining changes in violent behaviour over time the role of religion on violence how gender impacted on violence and how the level of Scottish violence fares when compared to incidents of violence throughout the rest of the UK This book offers a ground breaking contribution to the historiography of Scottish crime Not only does the piece illuminate for the first time the nature and incidence of Scottish criminality over the course of some three hundred years but it also employs a more integrated analysis of gender than has hitherto been evident This book sheds light on whether the stereotypical label given to Scotland as the violent north is appropriate or in any way accurate and it further contributes to our understanding of not only Scottish society but of the history of crime and punishment in the British Isles and beyond Jean Baudrillard: Selected Writings Jean Baudrillard, 2001 An expanded edition of the first comprehensive overview of Baudrillard s work this new edition adds
