Fatherless America Confronting Our Most Urgent Social Problem:

Fatherless America David Blankenhorn, 1996-01-05 A compelling and controversial exploration of absentee fathers and their impact on the nation

Fatherless America David Blankenhorn, 1995-02-08 [Catholic Bioethics for a New Millennium](#) Anthony Fisher, 2011-11-17 Can the Hippocratic and Judeo Christian traditions be synthesized with contemporary thought about practical reason virtue and community to provide real life answers to the dilemmas of healthcare today Bishop Anthony Fisher discusses conscience relationships and law in relation to the modern day controversies surrounding stem cell research abortion transplants artificial feeding and euthanasia using case studies to offer insight and illumination What emerges is a reason based bioethics for the twenty first century a bioethics that treats faith and reason with equal seriousness that shows the relevance of ancient wisdom to the complexities of modern healthcare scenarios and that offers new suggestions for social policy and regulation Philosophical argument is complemented by Catholic theology and analysis of social and biomedical trends to make this an auspicious example of a new generation of Catholic bioethical writing which has relevance for people of all faiths and none

A Delicate Choreography David Sabeen, 2023-10-24 The origins of the incest taboo have puzzled many of the most influential minds of the West from Plutarch to St Augustine St Thomas Aquinas Martin Luther David Hume Lewis Henry Morgan Sigmund Freud Emile Durkheim Edward Westermarck and Claude Lévi Strauss This book puts the discussion of incest on a new foundation It is the first attempt to thoroughly examine the rich literature from philosophical theological and legal treatises to psychological and biological genetic studies to a wide variety of popular cultural media over a long period of time The book offers a detailed examination of discursive and figurative representations of incest during five selected periods from 1600 to the present The incest discussion for each period is complemented with a presentation of dominant kinship structures and changes without arguing for causal relations Part I deals with the legacy of ecclesiastical marriage prohibitions of the Middle Ages Historians dealing with the Reformation have wondered about the political and social implications of theological debates about the incest rules the Enlightenment opted for sociological considerations of the household and a new anthropology based on the passions Baroque discourse focused upon sexual relations among kin by marriage while Enlightenment and Romantic discussions worried the intimacy of siblings The first section of Part II deals with the six decades around 1900 during which European and American cultures obsessed about the sexuality of women Almost everyone concurred in the idea that mother made the family what it was that she configured the household kept the lines of kinship vibrant and stood at the threshold as stern gatekeeper and many thought that she managed these tasks through her sexuality and an eroticized relationship with sons Another story line taken up in the section Intermezzo this one about the physical and mental consequences of inbreeding appeared after 1850 To what extent do close kin marriages pose risks for progeny At its center lay the incest problematic now restated Is avoidance of kin genetically programmed Do all cultures know about risks of consanguinity As for the twenty first century evolutionary and genetic

assumptions are challenged by a living world population containing roughly one billion offspring of cousin marriages Part III deals with one of the perhaps most remarkable reconfigurations of Western kinship in the aftermath of World War I The shift from an endogamous to an exogamous alliance system centered on the nuclear family An historical anomaly this family form began to dissolve almost as soon as it came together and in the process shifted the focus of incest concerns to a new pairing father and daughter By the 1970s when the father daughter problematic swept all other considerations of incest aside that relationship had come to be modeled for the most part around power and its abusive potential As for incest its representations in the last three decades of the twentieth century no longer focused on biologically damaged progeny but rather on power abuses in the nuclear family sexual abuse By the mid 1990s Western culture at least partly redirected its gaze away from father and daughter towards siblings especially towards brothers and sisters and the sexual boundaries and erotics of their relationships Correspondingly siblings became a model organism for psychotherapy evolutionary biology and the science of genetics

City of God Kevin Lewis O'Neill, 2010 *City of God* explores the role of neo Pentecostal Christian sects in the religious social political life of Guatemala O'Neill examines one such church looking at how its practices have become acts of citizenship in a new politically relevant era for Protestantism

The American Paradox David G. Myers, 2008-10-01 *DIV* For Americans entering the twenty first century it is the best of times and the worst of times Material wealth is at record levels yet disturbing social problems reflect a deep spiritual poverty In this compelling book well known social psychologist David G Myers asks how this paradox has come to be and more important how we can spark social renewal and dream a new American dream Myers explores the research on social ills from the 1960s through the 1990s and concludes that the materialism and radical individualism of this period have cost us dearly imperiling our children corroding general civility and diminishing our happiness However in the voices of public figures and ordinary citizens he now hears a spirit of optimism The national dialogue is shifting away from the expansion of personal rights and toward enhancement of communal civility away from efforts to raise self esteem and toward attempts to arouse social responsibility away from whose values and toward our values Myers analyzes in detail the research on educational and other programs that deal with social problems explaining which seem to work and why He then offers positive and well reasoned advice suggesting that a renewed social ecology for America will rest on policies that balance me thinking with we thinking *div*

Handbook of Father Involvement Natasha J. Cabrera, Catherine S. Tamis-LeMonda, 2012-12-06 This book brings together experts from diverse scientific disciplines who share an interest in the topic of father involvement Unlike most books in the field which tend to solely draw from a psychological perspective this Handbook merges theories and research from the unique fields of psychology economics demography sociology anthropology and social policy For the most part research on fathering is motivated by concern for children's well being Social scientists share a core set of questions including Who are fathers What is father involvement and how does it affect children and families What are the determinants of father involvement How do

cultural contexts shape fathers roles in families This Handbook sheds light on how a cross disciplinary approach to the study of fathering can advance knowledge about these fundamental questions This integrative approach is fundamental to a comprehensive understanding of human development generally and to fathering more specifically At the core of this book are the goals of describing and understanding the nature antecedents and consequences of father involvement across biological status family structure culture and stages in children s development both within and across scientific boundaries Each of the scientific disciplines represented offers unique methodological and theoretical approaches to the study of fathering and to the interpretation of behavioral patterns that characterize ecological systems that include as well as extend beyond family units Together the chapters offer provocative and challenging insight into the nature and meaning of fatherhood and father involvement by questioning longstanding assumptions about fathers roles in the lives of families and children in current history

Families of a New World Lynne Haney,Lisa Pollard,2014-06-03 From Prague to Tennessee to Brazil it s hard to find a consensus on what constitutes an average family In today s world the nuclear family is rarely the standard family structure if it ever was Families of a New World brings together an important collection of original works to examine our understanding of family around the world and how that understanding is shaped by state policy Using examples from both historical and modern countries around the world essays demonstrate not only how state policies shape what the family should look and act like but also how governments have appropriated and regulated an approved ideal of the family to further their own agendas

Post-Liberalism Melvyn L. Fein,2017-09-08 Liberalism is dying despite its superficial appearance of vigor Most of its adherents still believe it is the wave of the future but they are clinging to a sinking dream So says Melvyn L Fein who argues that liberalism has made countless promises almost none of which have come true Under its auspices poverty was not eliminated crime did not diminish the family was not strengthened education was not improved nor was universal peace established These failures were not accidental they flow directly from liberal contradictions In Post Liberalism Fein demonstrates why this is the case Fein contends that an inverse force rule dictates that small communities are united by strong forces such as personal relationships and face to face hierarchies while large scale societies are integrated by weak forces such as technology and social roles As we become a more complex techno commercial society the weak forces become more dominant This necessitates greater decentralization in direct opposition to the centralization that liberals celebrate Paradoxically this suggests that liberalism as an ideology is regressive rather than progressive If so it must fail Liberals assume that some day under their tutelage these trends will be reversed but this contradicts human nature and history s lessons According to Fein we as a species are incapable of eliminating hierarchy or of loving all other humans with equal intensity Neither as per Emile Durkheim are we able to live in harmony without appropriate forms of social cohesion
