**Truth, etc.** Jonathan Barnes, 2007-01-25 Truth etc is a wide ranging study of ancient logic based upon the John Locke lectures given by the eminent philosopher Jonathan Barnes in Oxford Its six chapters discuss first certain ancient ideas about truth secondly the Aristotelian conception of predication thirdly various ideas about connectors which were developed by the ancient logicians and grammarians fourthly the notion of logical form insofar as it may be discovered in the ancient texts fifthly the question of the justification of deduction and sixthly the attitude which has been called logical utilitarianism and which restricts the scope of logic to those forms of inference which are or might be useful for scientific proofs In principle the book presupposes no knowledge of logic and no skill in ancient languages all ancient texts are cited in English translation and logical symbols and logical jargon are avoided so far as possible There is no scholarly apparatus of footnotes and no bibliography It can be read in an armchair Anyone interested in ancient philosophy or in logic and its history will find it interesting
